1 Introduction

1.1 Fawzooz

Fawzooz is a non-profit for the human mind in the age of AI. It builds the knowledge and the tools that protect human thinking and decision as artificial intelligence advances, and gives them to everyone, free, in Arabic and in English. Its motto is «Engineer the invisible. Empower the decision.»

FAWZOOZ is a company limited by guarantee, registered in England and Wales, company number 17511660. It was founded by Prof. Dr. Mohamed Fawzi Elgendi, whose body of work in AI governance, cognitive security and Invisible Engineering is the source of what Fawzooz publishes. Everything it publishes is a waqf: given, not sold.

fawzooz.ai is where all of it lives. It is at once:

- **a library:** books, white papers, a playbook, research, a monograph and a biography; the «Fawzoozyat» story magazine; the «Metn» card sets; and the «Fawzooz Tapestry» series of articles. Every work is read on the site, as a book or section by section, with the reader's place remembered;
- **a working environment:** eight interactive tools and two open kits that turn the frameworks into instruments an organisation can use on itself, with results, reports and the community's average;
- **a programme:** the Wise AI Ambassador, six degrees and six gates, ending in a certificate and a membership card that anyone can verify;
- **six phone apps**, one for each part of the library, the tools and the programme, that install from the browser and work offline.

An AI assistant, also named «Fawzooz», answers questions from the published works and shows the pages it drew on. Beside it, «Message Fawzooz» lets a signed-in reader write to Fawzooz and have a person reply. And any AI assistant that supports the Model Context Protocol can search and read Fawzooz itself (section 4.8).

1.2 Official website and apps

Fawzooz lives at **fawzooz.ai**. Every page exists in Arabic (/ar/) and in English (/en/), and each one can be switched to the other language at any moment, keeping the reader on the same page.

Address	What is there
fawzooz.ai	The website: the library, the tools, the programme and Fawzooz itself
stories.fawzooz.ai	«Fawzoozyat»: a story a day, and every issue
cards.fawzooz.ai	«Fawzooz Metn»: a card a day, and every set
vault.fawzooz.ai	«Fawzooz Vault»: the books and papers, at a size the reader chooses
tapestry.fawzooz.ai	«Fawzooz Tapestry»: the five journeys and their articles
ambassador.fawzooz.ai	«Fawzooz Ambassador»: the degrees, lessons, gates, card and certificate
tools.fawzooz.ai	«Fawzooz Tools»: the assessments, one question at a time
mcp.fawzooz.ai	Fawzooz for AI assistants (MCP), public and read-only

1.3 Areas

Fawzooz is made of four areas:

- **The public site**, open to everyone without signing in: Fawzooz and its organisation pages, the publications and their readers, the tools, the Wise AI programme, the archive and the policies.
- **The reader's space**, for those who choose to sign in with their email: «My account», with progress, badges, results, requests, answers, a personal path, conversations and the reader's own details, kept in step across devices.
- **The assistant and «Message Fawzooz»**, for signed-in readers, from any page.
- **The apps**, six of them, which share the same account and the same progress.

Signing in is optional. Everything on the public site and in the apps works without an account, and keeps the reader's progress on their own device.

1.4 About this guide

This guide is an overview. It is for readers, partners and organisations who want to understand what Fawzooz offers, how it is organised and what it makes possible. It describes Fawzooz as an organisation, its philosophy, its mechanisms and features, its interfaces, and the programmes and collections built on it.

It is not a manual for each tool: every tool explains itself on its own page, with its method, its source and how to cite it.

1.5 What Fawzooz holds

Wise AI degrees	6, with 34 units and 6 gates
Publications	102: 22 book and paper editions, 40 issues of «Fawzoozyat» and 40 «Metn» card sets, counting each language
Cards	232 in each language, in 20 sets
Teaching videos	48 in Arabic for the programme, released degree by degree
Apps	6
Languages	2, for every work

The «Impact in numbers» page shows these with live figures: copies sent, assessments taken, accounts, subscribers, answers, and the programme’s learners, gates and certificates (chapter 10).

2 A non-profit and a waqf

2.1 What Fawzooz is

Fawzooz's vision is a world where AI advances and the decision stays human. Its mission is to build the knowledge and the tools that protect the human mind in the age of AI, and to give them to everyone. It is a non-profit, not a company that sells, and not a course to buy: its works, tools and programme are free, and what supports it is the time, skill and reach that people give to it (chapter 10).

2.2 The three waws

Three words, each beginning with the Arabic letter waw, hold what Fawzooz stands for:

- **Fawzooz**: the name, and the body of work it carries;
- **Wa'y** (awareness): using AI with a conscious mind, never blindly;
- **Waqf** (endowment): knowledge given freely, for a benefit that never ends.

They appear on the «About» page and close the Wise AI charter.

2.3 The Fawzooz Waqf Licence

Every work Fawzooz publishes carries the Fawzooz Waqf Licence, «Towards free knowledge, and a benefit that never ends». Its short charter has four points:

- **The work's origin**: it is a waqf, free to read, use and share;
- **Freedom bound by value**: work built on it, adding value, may be used commercially; reselling the original as it is may not;
- **The red line**: nothing against Islamic law, cybercrime laws, or that spreads hatred or fraud;
- **Faithful attribution**: the source is always named.

The full terms add that the licence is worldwide, free and non-exclusive; that what is built on the work is shared the same way; that AI trained on it must cite the source; and that misuse ends the licence. The «Digital Waqf» page sets out the charter, the terms, common questions, a snippet to copy and the licence marks to download. Each PDF edition repeats the licence on its rights page.

2.4 The Wa'y standard

«The Fawzooz Wa'y Standard» sets out how Fawzooz itself works with AI: «From blind autocomplete to conscious cognitive leadership». Its mark appears on the works it governs, and its page explains it in both languages.

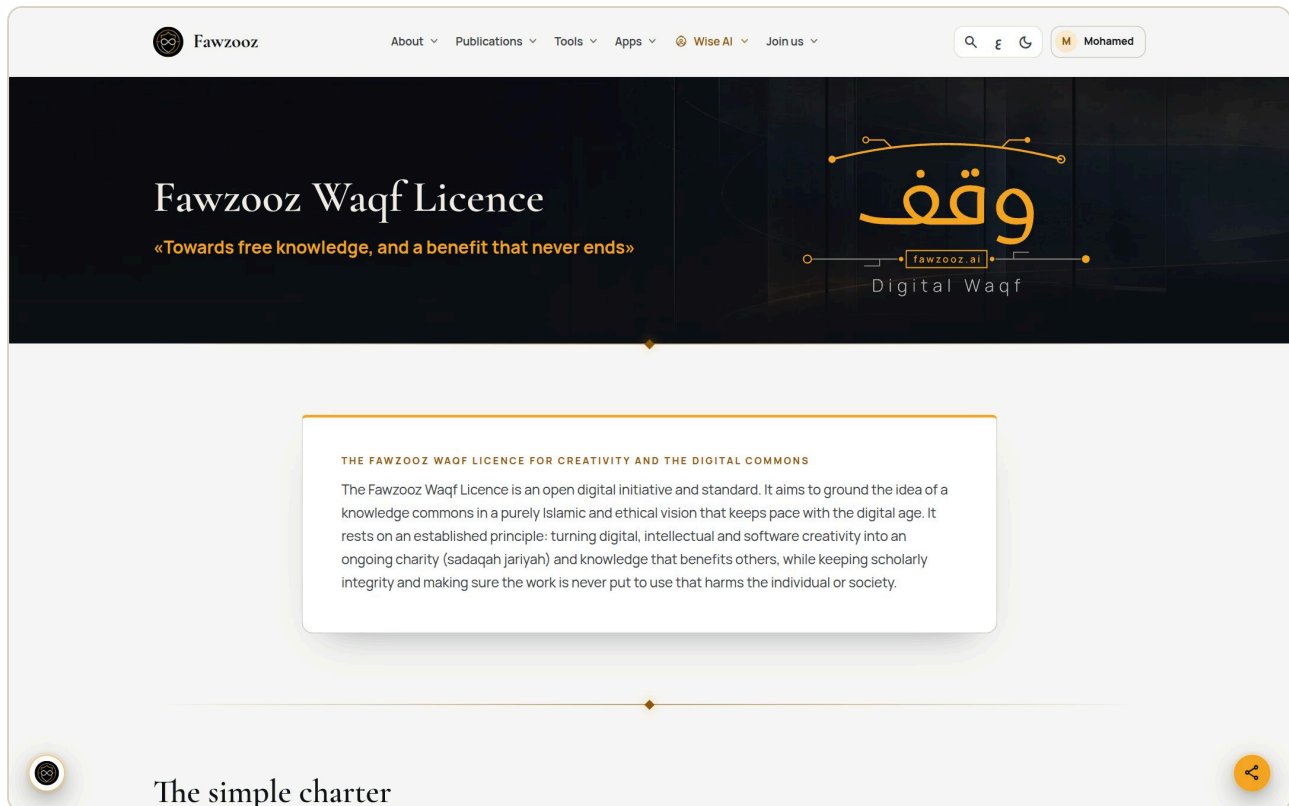

Figure 7 · «The Digital Waqf»: the licence, its charter and its marks

2.5 Bilingual by design

Arabic is not a translation added later. Each page, tool, report, card, certificate, app and email is written in both languages. The layout follows the language: right to left in Arabic, left to right in English, with Arabic numerals and Arabic typography where they belong. A reader's name, too, is written in each language as they give it (section 5.1).

2.6 Not only a library

Beyond reading, Fawzooz offers:

- a community indicator for each measuring tool, built from anonymous results;
- an assistant that answers from the works and cites them, and «Message Fawzooz», a direct line to a person;
- a story magazine whose readers answer each issue's question;
- card sets of applied wisdom, a card a day;
- a personal path, one step at a time at the reader's own pace;
- reading badges for each publication read to the end;
- a certificate programme with public verification;
- personal PDF copies that anyone can verify;
- ways to take part: collaborate, contribute, and follow the news.

3 Philosophy

3.1 Separation of content and engine

Fawzooz separates what it says from how it works. The texts, the programme, the publications, the cards and the definitions of the tools are kept as structured content. One engine reads that content and produces every page, reader, tool, app and report from it.

The main advantages of this approach are:

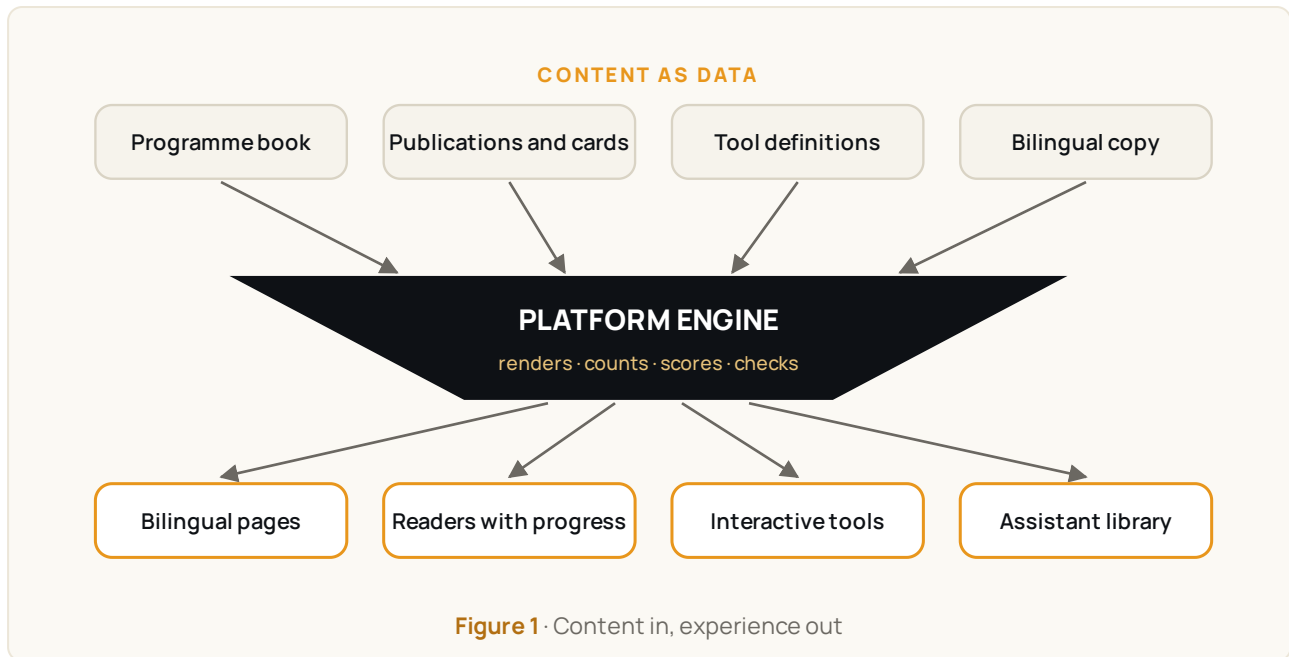

- **consistency**: every publication's reader, every tool and every report behaves the same way;
- **growth without rework**: a new publication, card set or tool is new content, not a new site;
- **two languages from one source**: Arabic and English are two faces of the same structure;
- **one content, many surfaces**: the website, the apps, the PDF editions and the assistant all read the same source.

3.2 The logic of content as data

All of Fawzooz's behaviour comes from content prepared once:

- the programme book: its degrees, units, exercises, gates and videos;
- each publication: its book pages, its sections, figures, ISBN and citation;
- each magazine issue: its pages, stories, capsules and question;
- each card set: its cards, its idea, exercise and takeaway;
- each Tapestry journey: its articles;
- each tool: its statements, scales, dimensions, bands and advice;
- the site's bilingual copy.

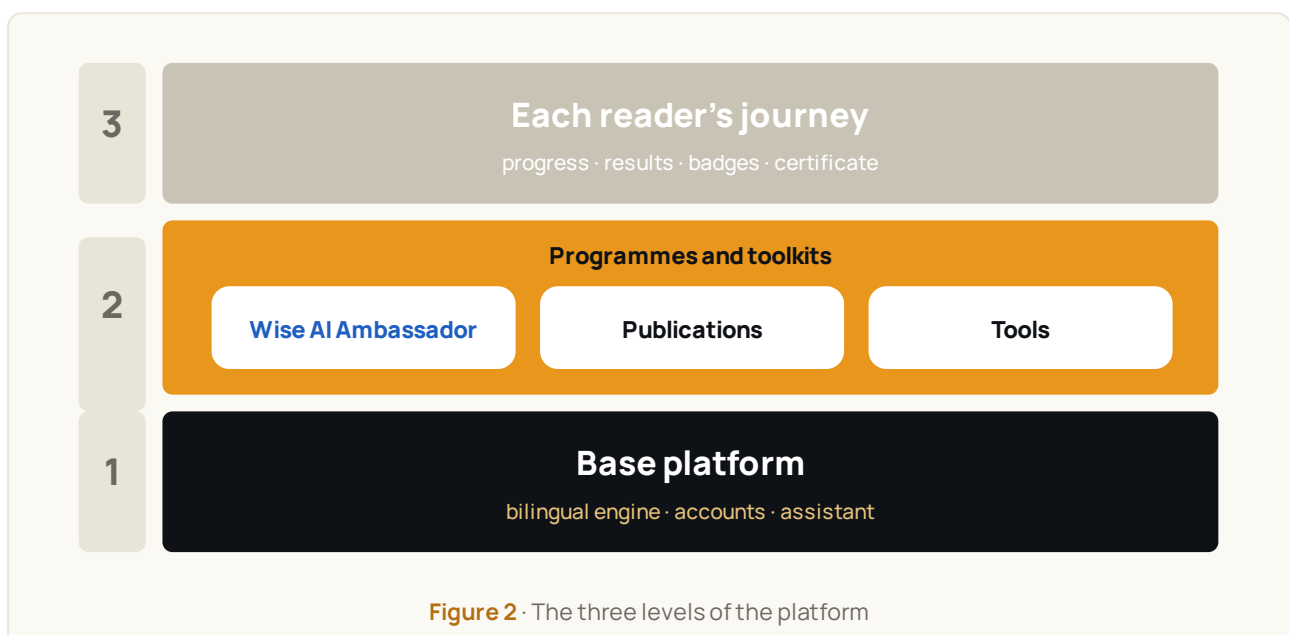

From these, the engine builds the pages, the readers that remember progress, the interactive tools, the apps, the PDF editions and the library the assistant searches.

3.3 Three levels

Fawzooz can be seen as three levels:

- **level 1**, the base platform: the bilingual engine, accounts and the assistant;
- **level 2**, the programmes and collections built on it: the Wise AI Ambassador programme, the publications, the magazine, the cards and the tools;
- **level 3**, each reader's own journey: their progress, results, badges and certificate.

3.4 Privacy by design

Privacy is a property of the design, not a setting:

- without an account, progress and answers stay on the reader's own device;

- tool results that feed the community average are anonymous: the scores only, never names, emails or answers;
- accounts need no password: a code sent to the reader's email signs them in;
- readers can download all their data, or delete their account and everything kept under their email, from «My account»;
- data is kept only as long as the published retention schedule allows (chapter 11).

4 Mechanisms

4.1 The bilingual content model

Each piece of content carries its Arabic and English forms side by side. Pages, navigation, tools, results and emails choose the reader's language, and the switch between languages keeps the reader where they are, including the section, the query and the anchor on the page.

4.2 The reading engine

Every publication is read in two modes, and the reader moves between them with one switch, «Book / Read». The choice is remembered.

- **Book:** the publication's own pages, in its current edition (6 × 9 inches), as an open book. On a wide screen two pages face each other; on a phone one page fills the width. An Arabic book opens from the right, an English one from the left.
- **Read:** the same work section by section, each section with its own address, a contents list that marks the sections already read, and a progress bar.

In the book mode, every chapter opens a spread, on its first side, and the cover faces the page after it. Pages turn with the buttons, the arrow keys or a swipe; the contents jump straight to a page; the address carries the page, so a link opens on it; and a full-screen view gives the book the whole screen. The page reached is remembered for each book and language, and on all devices when signed in.

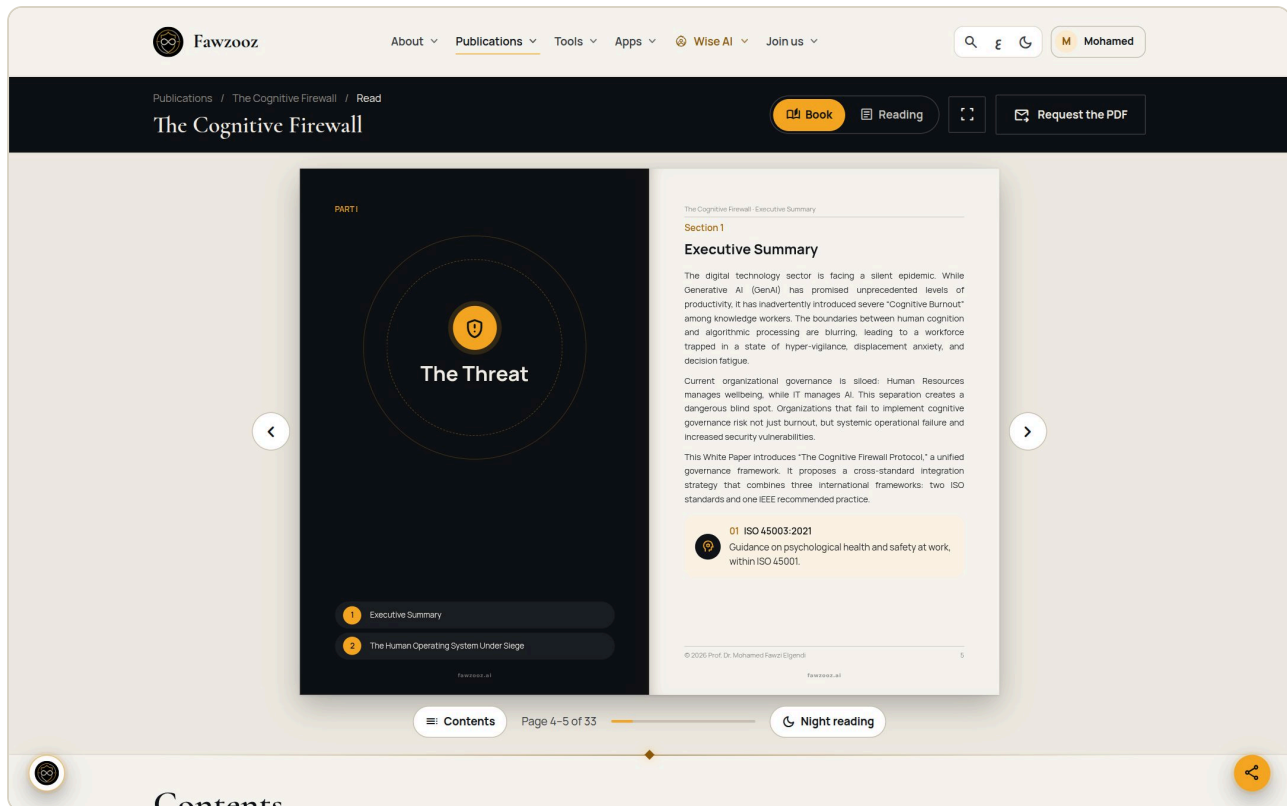

Figure 8 · A publication in the book mode: two pages facing each other

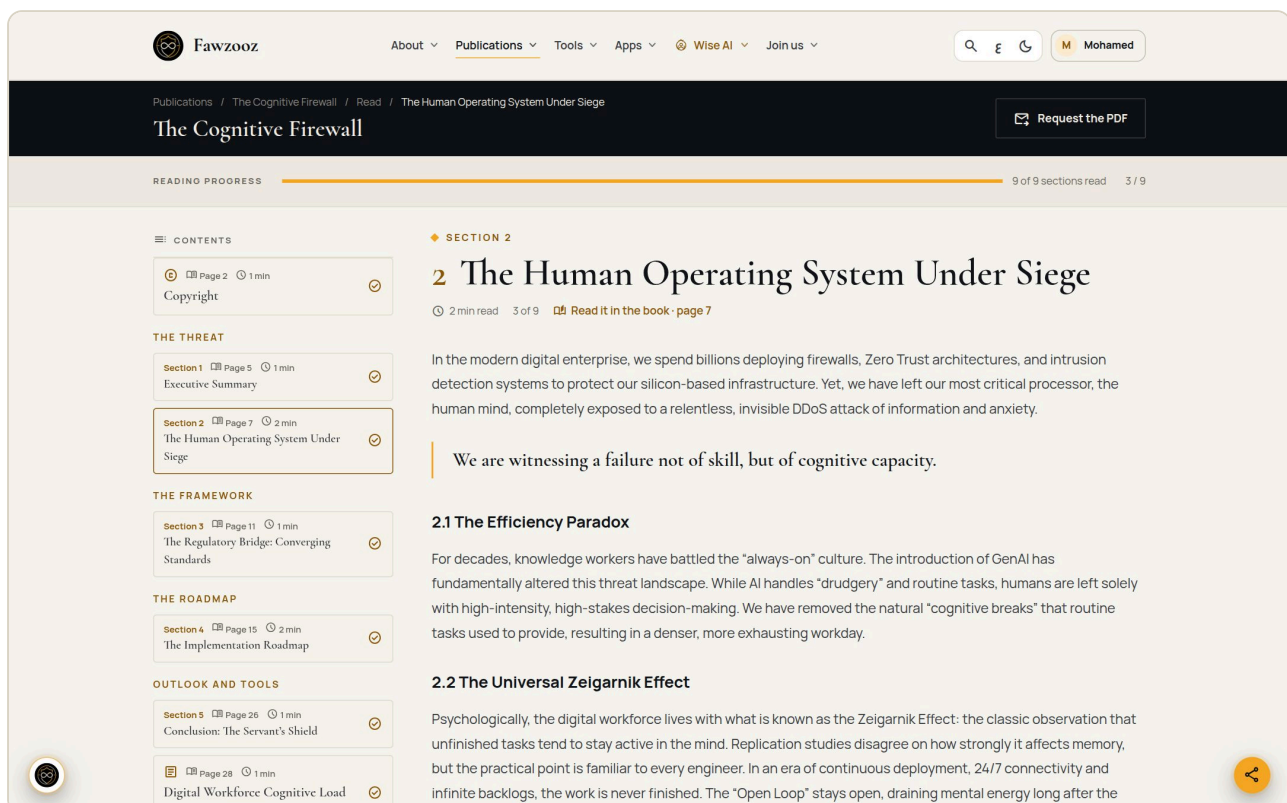

Figure 9 · The same publication in the reading mode, section by section

4.3 The measuring-tools engine

The measuring tools share one engine: a set of statements, a scale, dimensions or phases, and bands that turn a score into a level with advice. Some tools ask for evidence: an answer without

evidence counts for less, as the method prescribes. The result appears as the reader answers, and the weakest dimension or phase is pointed out, with the matching step to take.

Start again

Figure 10 · The UCSMM self-assessment: statements, scale, evidence and the live result

4.4 The reports engine

A signed-in reader who completes a measuring tool can produce a branded report: their name, the date, the result and its level, the priority, the weakest dimension, every part and every answer, and the community's average. The report is saved as a PDF from the browser, so the Arabic is set exactly as on the page.

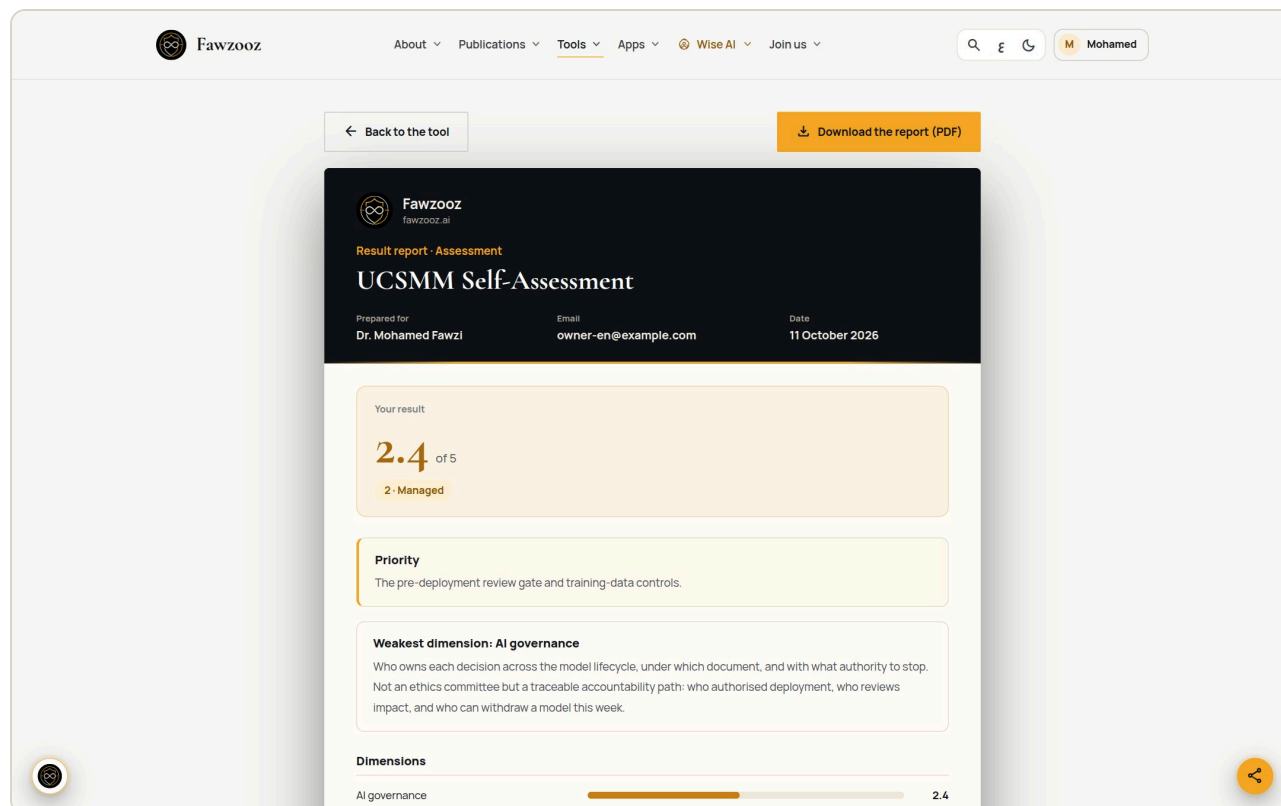

Figure 11 · A result report, ready to save as PDF

4.5 Community indicators

When a reader completes a measuring tool, its final numbers (the score and its parts, nothing else) are counted anonymously. Once ten people have taken a tool, the tool shows the community's average beside the reader's own result. A retake replaces the earlier result instead of counting twice.

4.6 The AI assistant

«Fawzooz» is an AI assistant that answers from the works Fawzooz publishes. It does not answer from general knowledge: it searches the site's library, reads the passages it finds, and answers from them, listing the pages it used as sources. It speaks for Fawzooz and of the founder in the third person, and says plainly that it is an assistant; anyone who wants the founder himself is pointed to the Collaborate page.

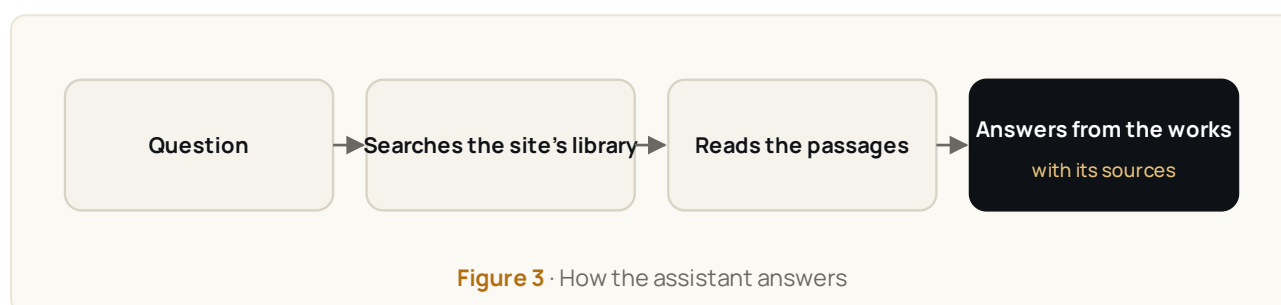

Figure 3 · How the assistant answers

The assistant is open to signed-in readers, so that every conversation belongs to a verified address. It has daily limits per person and for the whole platform, and answers one question at a time per

person. Conversations are deleted after 90 days.

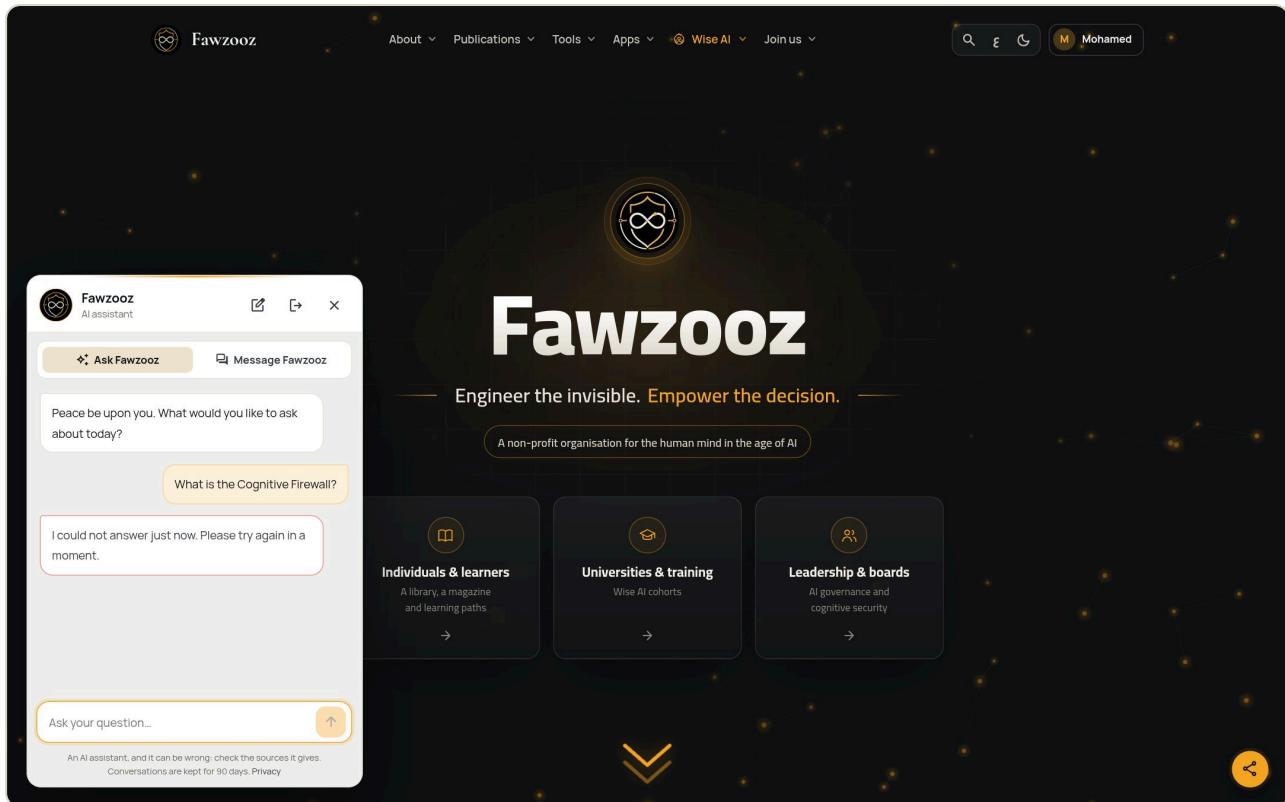

Figure 12 · The assistant, answering with its source

4.7 One account, every app

The six apps are web apps: each opens at its own address and installs from the phone's browser («Add to Home Screen»), with the steps shown on the site. They work offline, apart from the videos, and keep the reader's place. A reader who signs in to an app with the same email finds the same progress as on the website. Four of them («Fawzoozyat», «Metn», «Vault» and «Tapestry») offer «My path»: a few questions, then a personal series to follow.

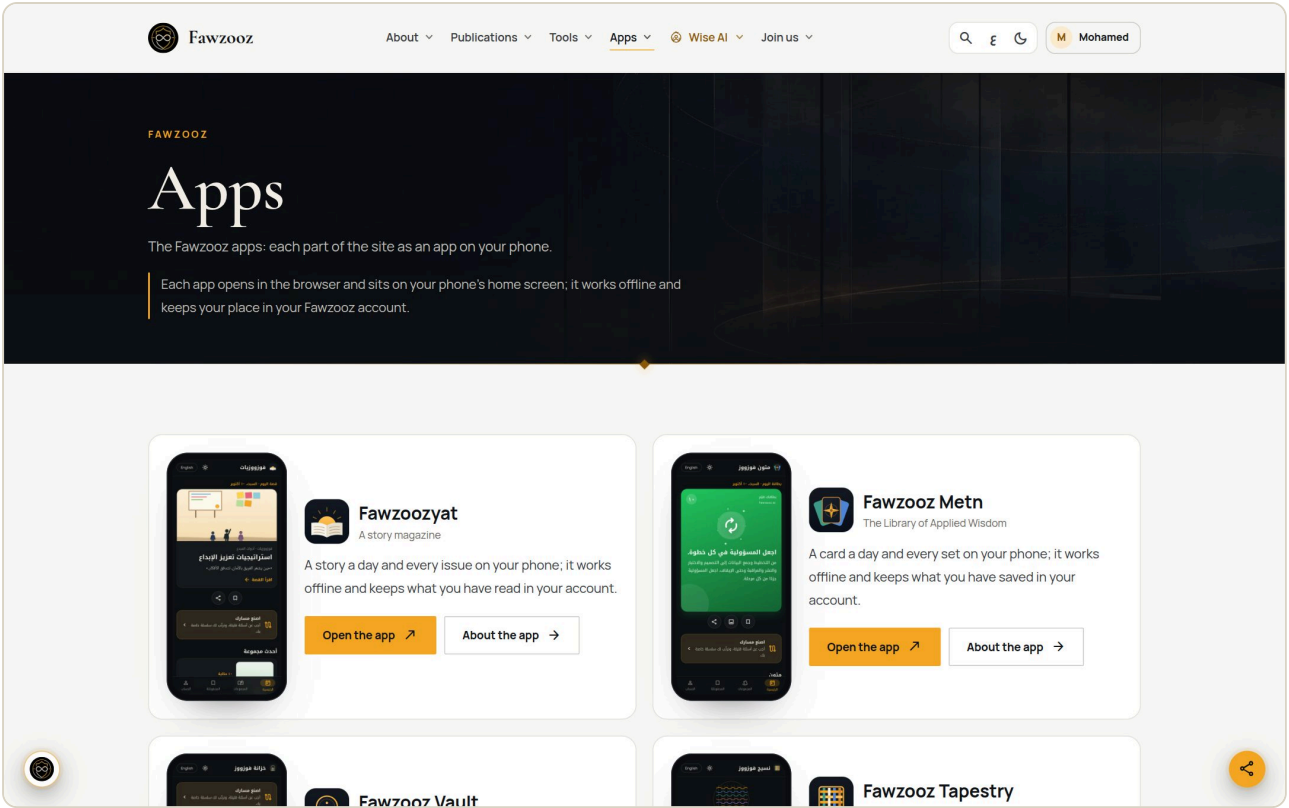

Figure 13 · The apps: one for each part of Fawzooz

4.8 Fawzooz in your AI assistant (MCP)

Fawzooz is also open to AI assistants. At `mcp.fawzooz.ai/mcp` it runs a public, read-only server for the Model Context Protocol, the open standard that assistants such as Claude and ChatGPT use to reach outside sources. No account or key is needed. An assistant connected to it can:

Tool	What it does
search	Search every thing Fawzooz publishes, in Arabic or English
read_page	Read a page of the site
list_pages	List the pages, or those of one section
verify_certificate	Check a Wise AI Ambassador certificate by its number
verify_copy	Check a personal PDF copy by its code, and whether its file is unchanged

The «Press» page gives the command to add it, and the assistant answers with links to the pages it read.

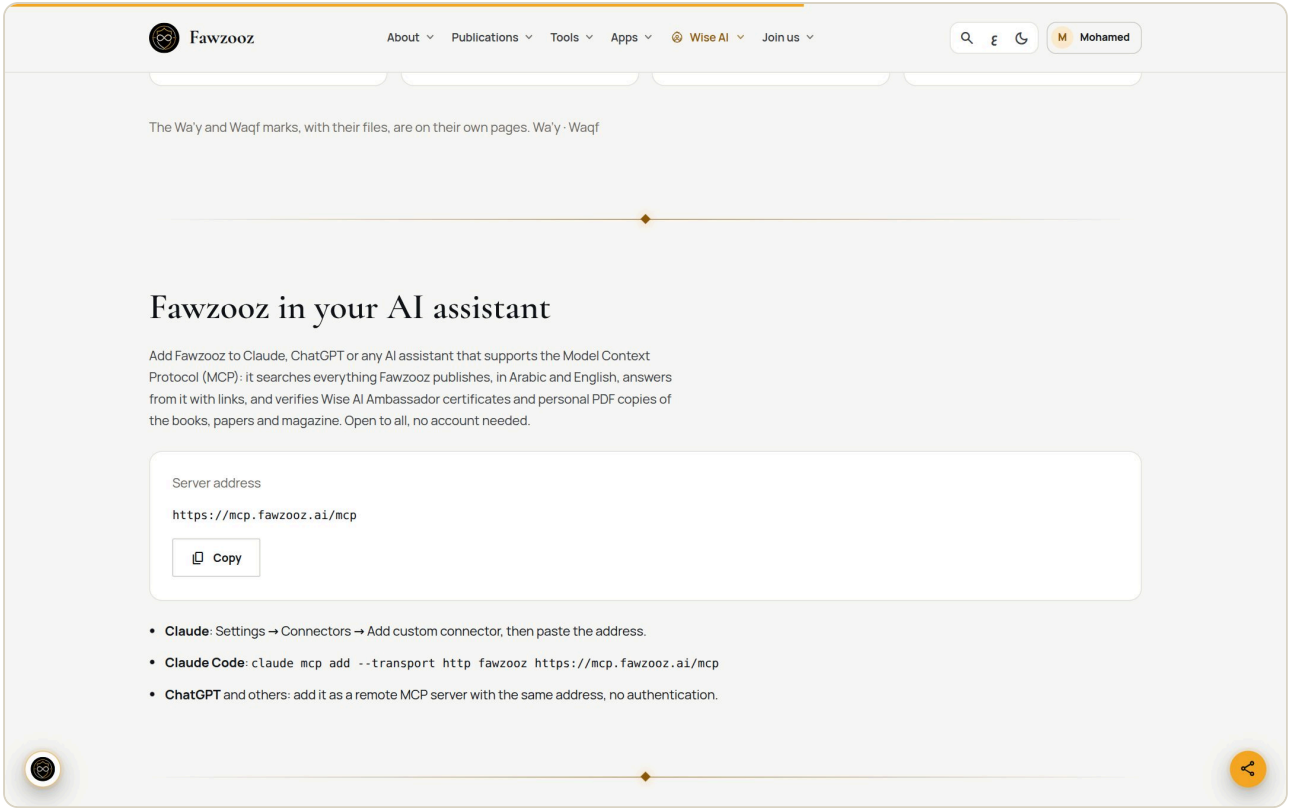

Figure 14 · «Fawzooz in your AI assistant» on the «Press» page

5 Features

5.1 Optional accounts, and the reader's name

A reader signs in with their email and a six-digit code sent to it, valid for ten minutes. There is no password. A sign-in lasts seven days on that device. From then on, the progress the site keeps (readings, programme units and gates, exercise answers, tool answers, badges) is kept in the account as well, and follows the reader to every device and app.

The first time, the reader gives their name and, if they wish, a title chosen from a list: Prof. Dr. (أ.إ.), Dr. (د.), Eng. (م.), Mr or Ms (إ.). In «My data» they can write their name in Arabic and in English. Everything written in one language, from an email to a certificate, then names them in that language, after their title as that language writes it; when one of the two names is empty, the other is used.

5.2 Continue where you left off

Fawzooz remembers where each reader stopped. A publication, an issue or the programme opens again where the reader left it; a measuring tool keeps its answers, to be finished later; and «My account» leads straight back to the reader's place in the Wise AI programme.

5.3 Reading badges

Each publication read to its last section earns a named badge: a medal with the publication's own symbol and ribbon colour. Reading them all completes the grand badge. Badges are shown in «My account». They follow a reader's reading; they are not a certificate.

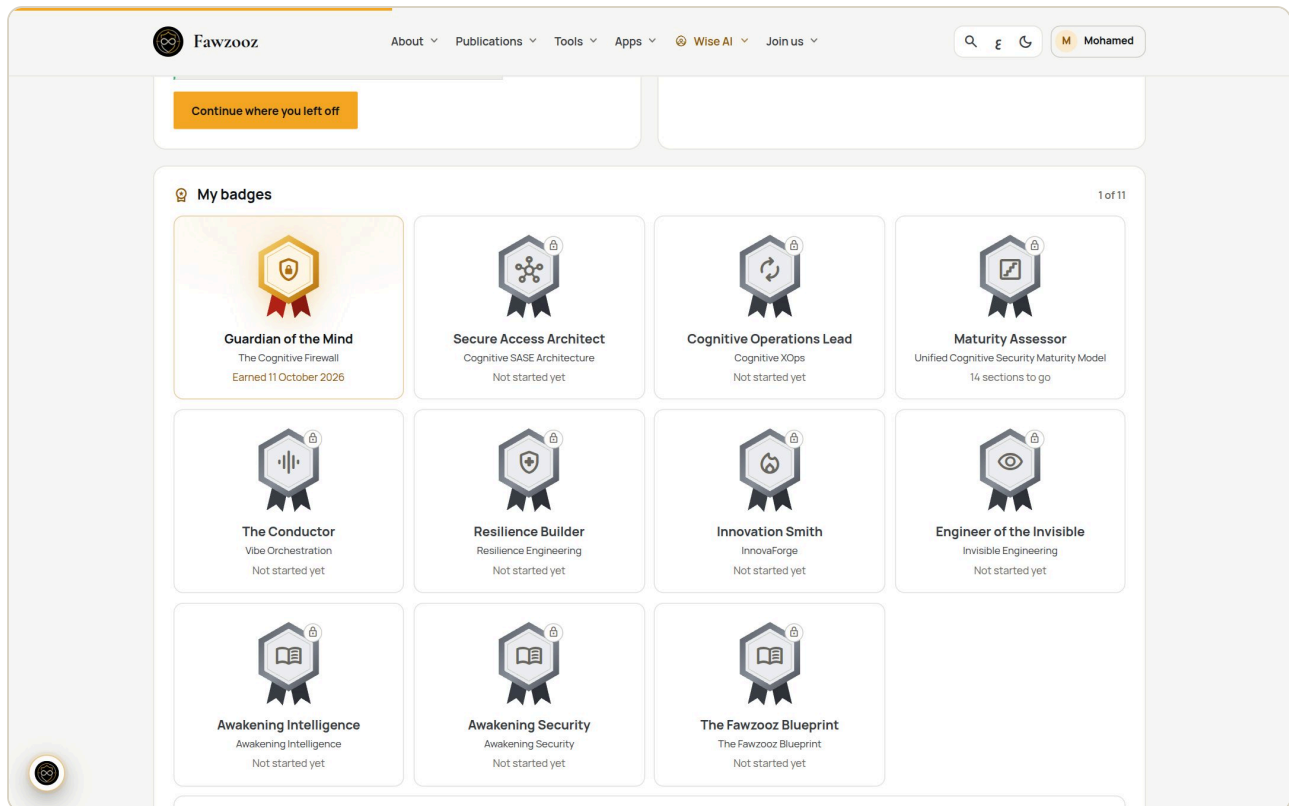

Figure 15 · «My badges» in the reader's account

5.4 Certificates and public verification

The Wise AI Ambassador programme ends in a certificate issued by FAWZOOZ. The reader signs the charter, their gate work is reviewed, and an approved certificate receives a number. Anyone can scan its QR code, or type the number on the site's verification page, to see whether it is genuine (chapter 8).

5.5 Personal PDF copies

A reader can ask for the PDF of any publication, any issue of the magazine, or any card set, with its «Request the PDF» button. A request needs an account: for a signed-in reader it takes one click, and anyone else signs in with their email first and the request follows.

Requests are approved automatically while the site's sending load allows (by default up to 20 an hour and 80 a day); beyond that, a request waits and is approved in turn, oldest first. Its status appears in «My account». An approved request sends the reader a personal link by email; it opens three times, within 24 hours of the first opening, and for seven days at most, and while it lasts the same download is in «My account».

Each copy is personal. A page right after the cover carries a letter to the reader by name, and a box that issues the copy in their name, with their email, the date and the copy's own ten-character code. The edition's own pages are left as they are: its rights page, with its ISBN, the Waqf licence and the publisher, FAWZOOZ; and, in each issue of the magazine, its imprint page.

The box carries a QR code. Scanning it, or typing the code on «Verify a copy» (/pdf/verify), confirms that Fawzooz issued the copy, showing the work, the date and the reader's initials, never their name

or email. The page can also check a file against it: the browser reads the file on the visitor's own device, uploads nothing, and says whether it is the file that was issued.

This guide is the one exception: it is not a request, but a free download from the publications page.

5.6 Gifts

A copy of a publication can also reach someone as a gift. The recipient receives an email with a personal link, under the same rules, and needs no account to open it. The gift copy carries the same personal page, in the recipient's name.

5.7 Search everything

«Explore» (Ctrl K / ⌘K) searches all of Fawzooz from any page: publications and their sections, issues, cards, articles, tools, programme units and pages, in both languages.

5.8 A card for every page

Every page has its own sharing card, drawn from the page itself: its title, its kind and Fawzooz's identity. A link shared on social media shows what it leads to.

5.9 News by email

Readers can subscribe from the foot of any page. The address is kept only after it is confirmed from the email sent to it, and every email carries a link to leave the list at once. A signed-in reader can also join or leave the list from «My account», with one switch.

5.10 The reader's data, in the reader's hands

From «My data» in «My account», a reader can add a photo, choose their title, write their name in Arabic and in English, join or leave the mailing list, download everything Fawzooz keeps about them as a file, sign out, or delete their account. They can also read or delete their conversations with the assistant. Deleting the account removes, at once, the account, its progress, conversations and requests, and the messages, mailing-list entry and unissued certificate requests under the same email. An issued certificate stays verifiable; only its gate work is erased.

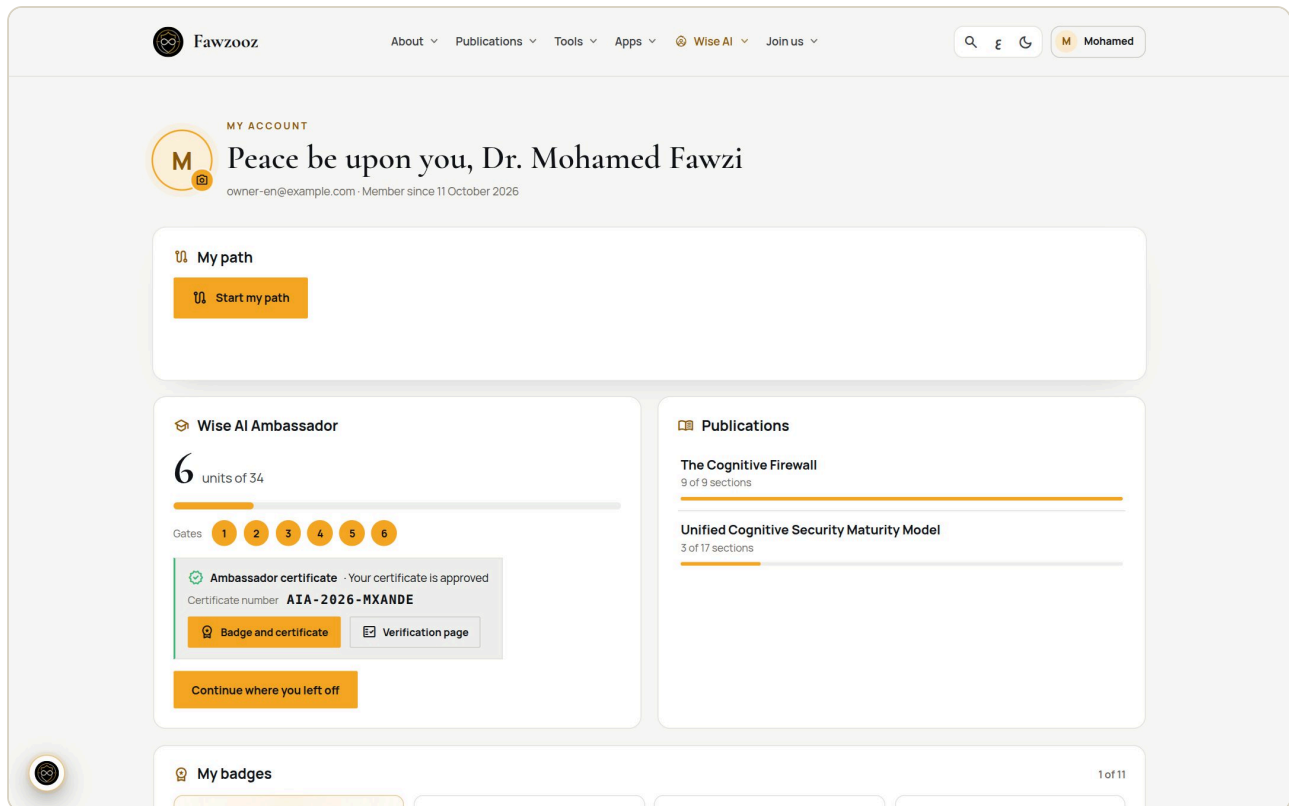

Figure 16 · «My account»: the path, the programme, the publications and the tools

5.11 «Message Fawzooz»

«Message Fawzooz» is the second tab of the assistant's window. There, a signed-in reader writes to Fawzooz itself, and a person, not the assistant, replies. The message arrives at once; the reply appears in the same conversation on the site, within seconds, and reaches the reader by email if they have left the page. The window says whether Fawzooz is available now or usually replies within a day. Messages are kept 90 days, and a reader can delete their conversation at any time.

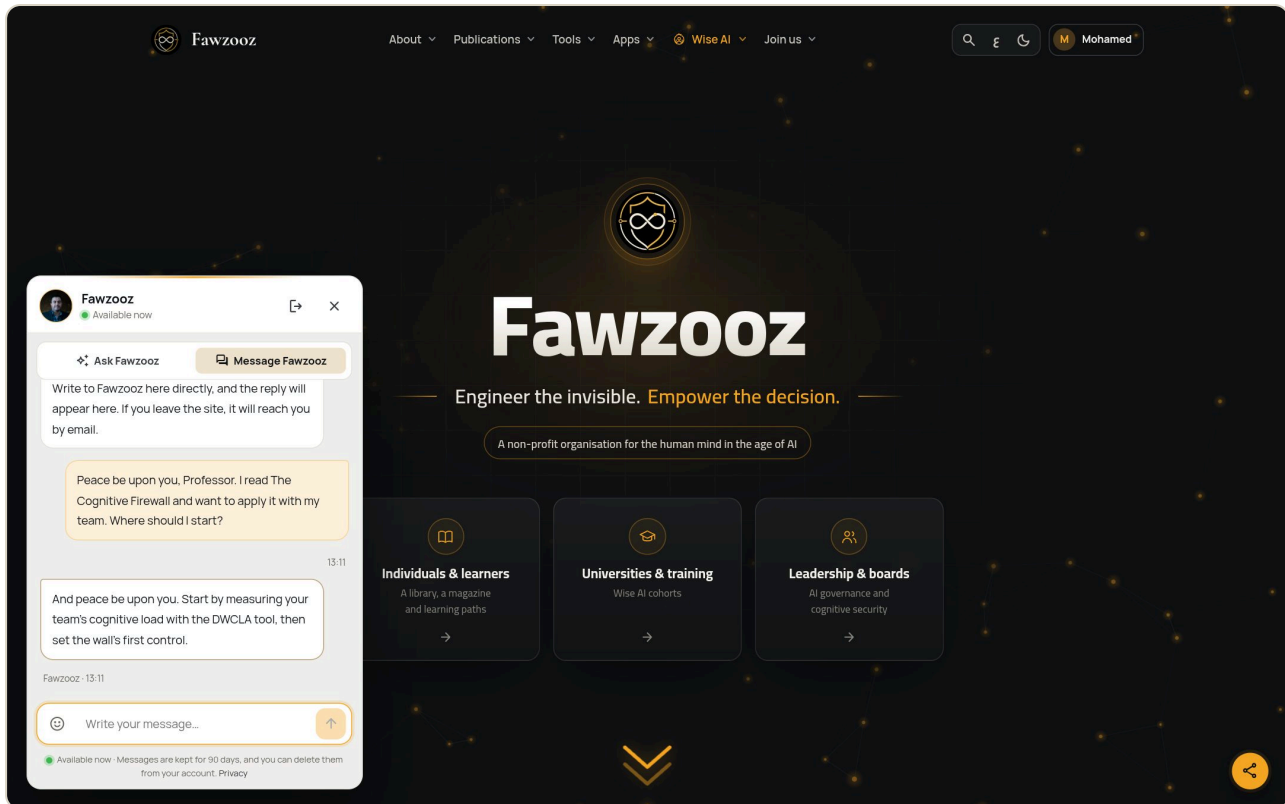

Figure 17 · «Message Fawzooz»: a conversation answered by a person

5.12 A personal path

A signed-in reader can join a path suited to their role and goal: one step at a time, a step a week or every two weeks, by email, and by Telegram if they wish. Opening a step brings the next one sooner; steps left unopened slow the pace, and then pause the path with one question, «Shall we continue?». «My account» shows the path and its steps, and the reader can pause, resume, change the pace or stop at any time.

6 Interfaces

6.1 The web, on a computer

The site is designed for reading, in a light and a dark theme, with generous type for Arabic and English. Its header gathers everything in six groups, each opening a panel of every page in it:

Group	What it holds
About	About Fawzooz, the system, impact in numbers, news and events, the Digital Waqf, the Wa'y standard, the founder, press; and the policies
Publications	Books and papers, «Fawzoozyat», «Metn», articles, «Fawzooz Tapestry», the archive; and «Verify a copy»
Tools	The eight tools, and the open kits
Apps	The six apps
Wise AI	The programme, its book, the card and certificate, verifying a certificate
Join us	Collaborate, contribute, and Fawzooz's links

Beside them are search, the language switch, the theme switch and sign-in. The foot of every page lists every page again, in five columns, with the newsletter, the contact address and the Waqf and Wa'y seals.

The home page introduces Fawzooz to a first-time visitor: three doors (individuals and learners, universities and training, leadership and boards), the organisation in a minute, what Fawzooz holds, the three ideas behind it, the founder, the latest news, and an invitation to take part in the waqf.

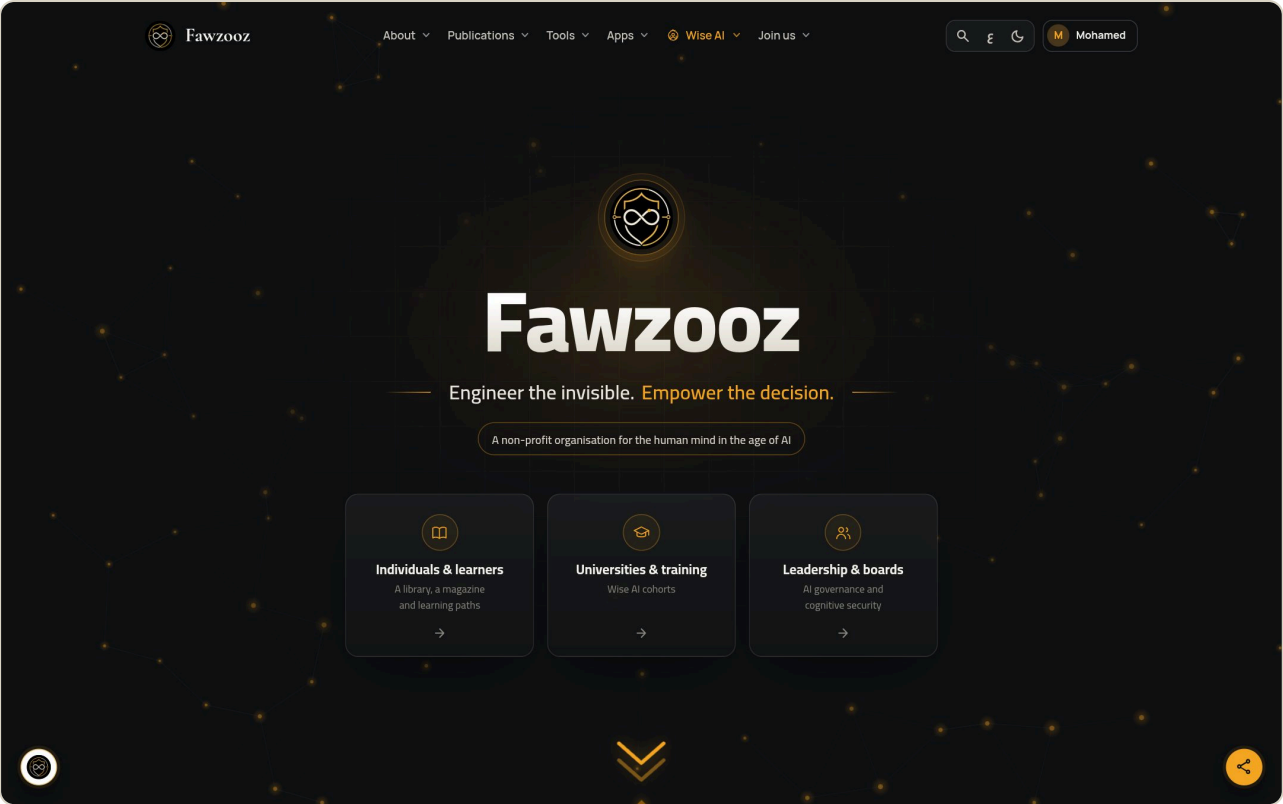

Figure 18 · The home page

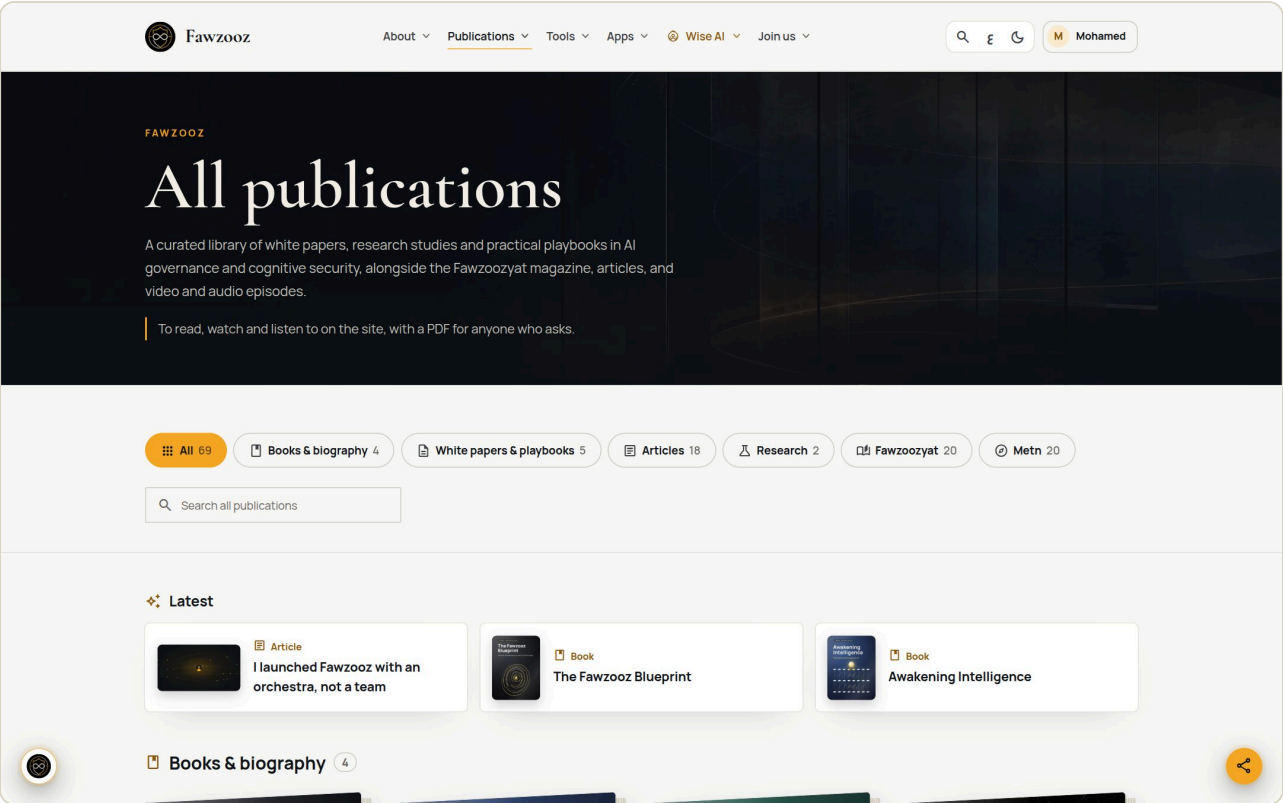

Figure 19 · The publications: every work in one list, by kind

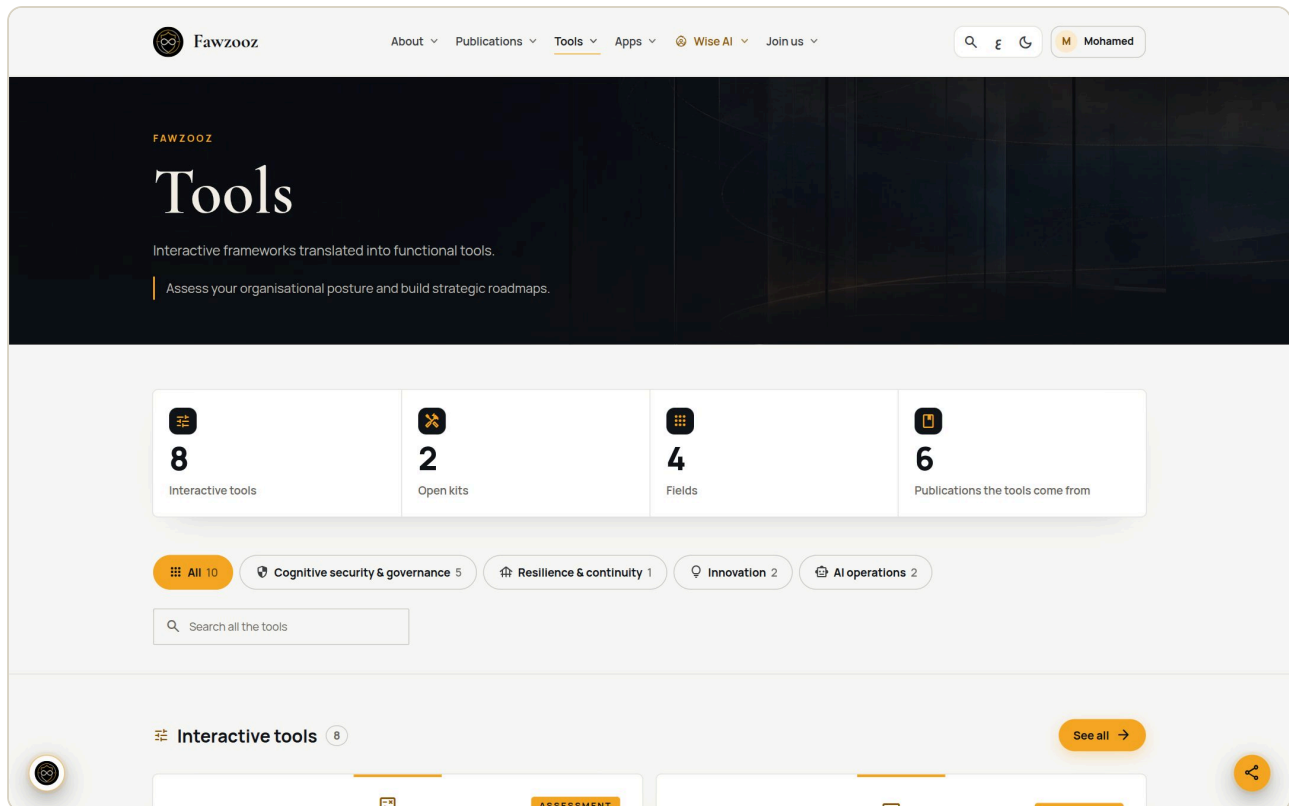

Figure 20 · The tools

6.2 The web, on a phone

Every page, reader and tool adapts to a phone screen. The menu gathers the six groups, the language, search, the theme and sign-in. A book or a magazine shows one page at a time across the width, turned with a swipe.

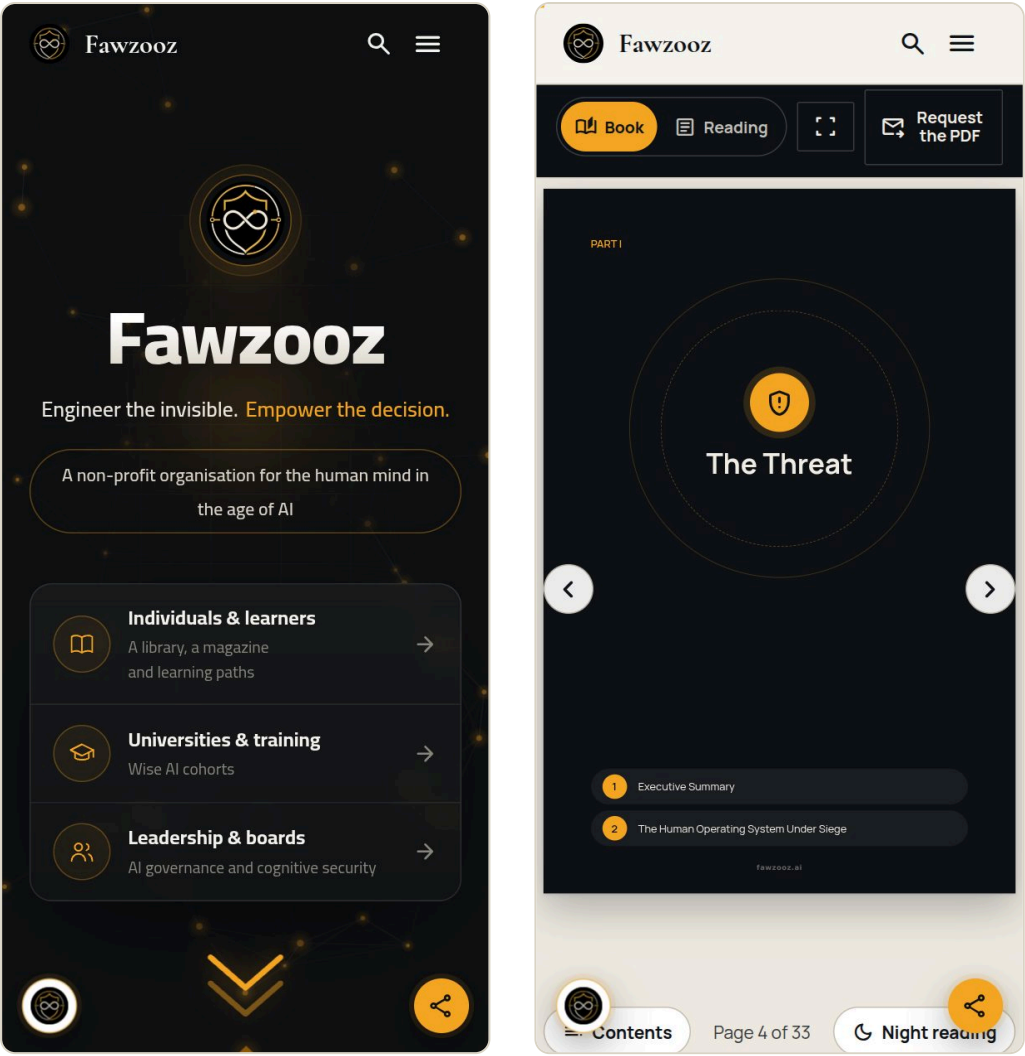

Figure 5 · The home page and a book on a phone

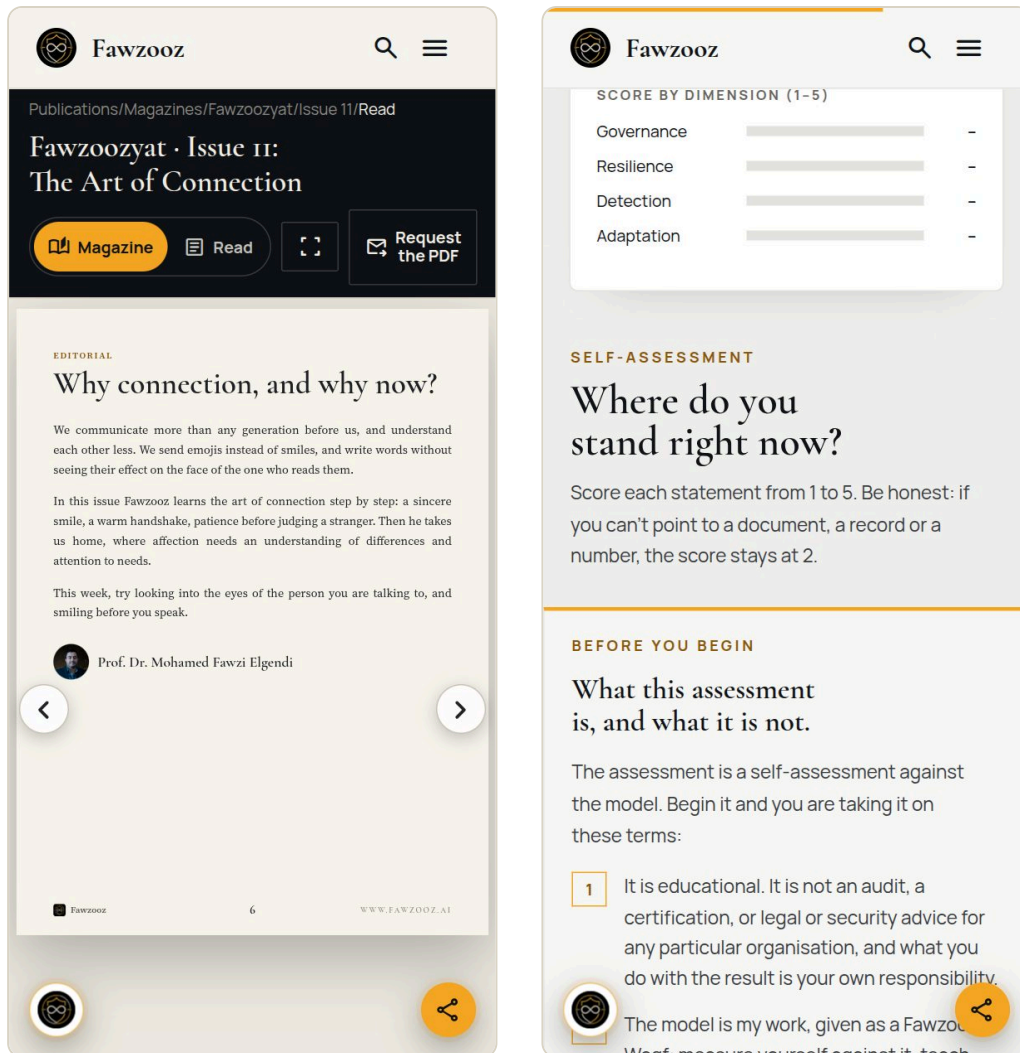

Figure 6 · An issue of the magazine and a tool on a phone

6.3 The tool pages

Each tool page follows the same order: what the tool is and how it works first, the explanation of its method next, and the tool itself last, with a button at the top that leads straight to it. The page closes with the source the tool is built on and a citation ready to copy.

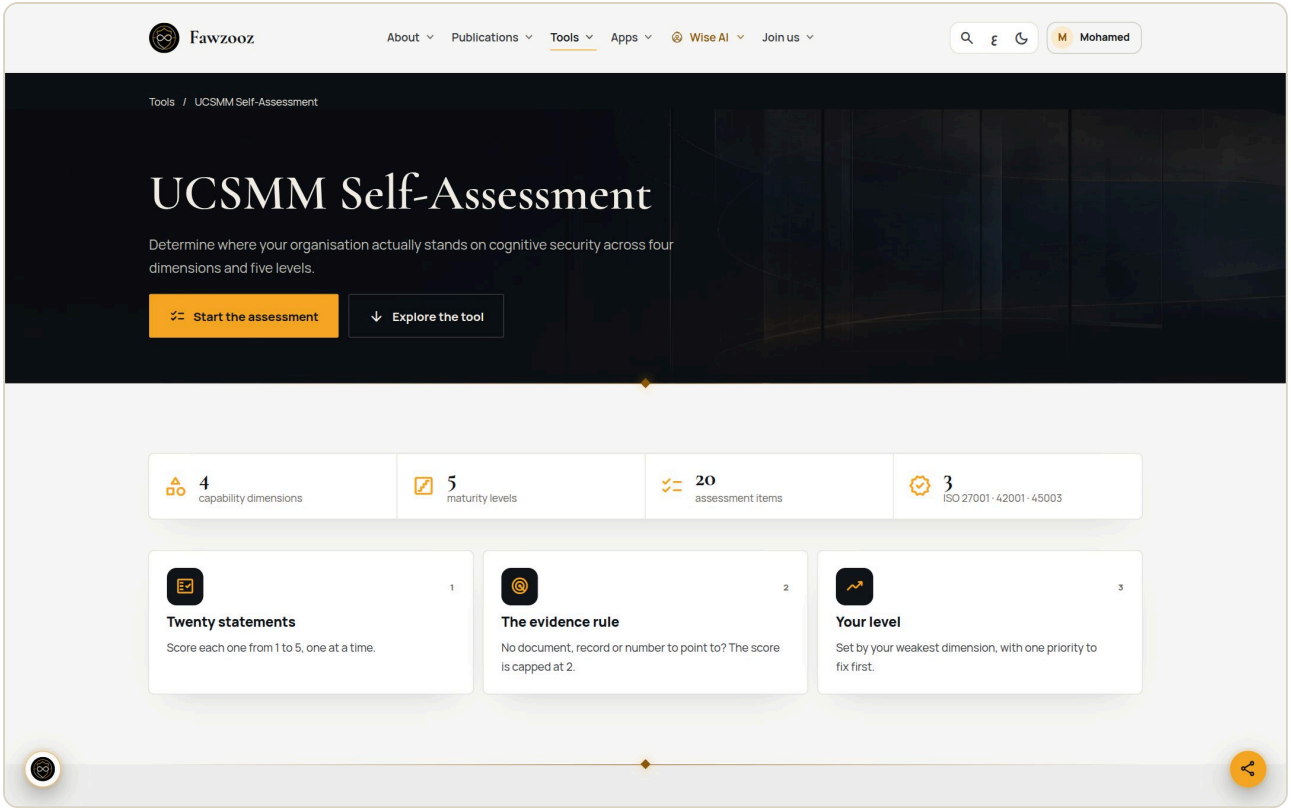

Figure 21 · A tool page: what it is, how it works, and the way straight to the tool

7 The Wise AI Ambassador programme

7.1 The programme

The Wise AI Ambassador is Fawzooz's programme for people who want to lead teams in which humans and machines work together, from the very beginning. It is read as a book on the site and in the «Fawzooz Ambassador» app, with exercises, gates, videos and a closing charter. It is free, under terms that make it a Fawzooz programme under the laws of England and Wales: it may not be sold, issued in another's name or used to train AI, and translating it or teaching it for a fee needs written permission.

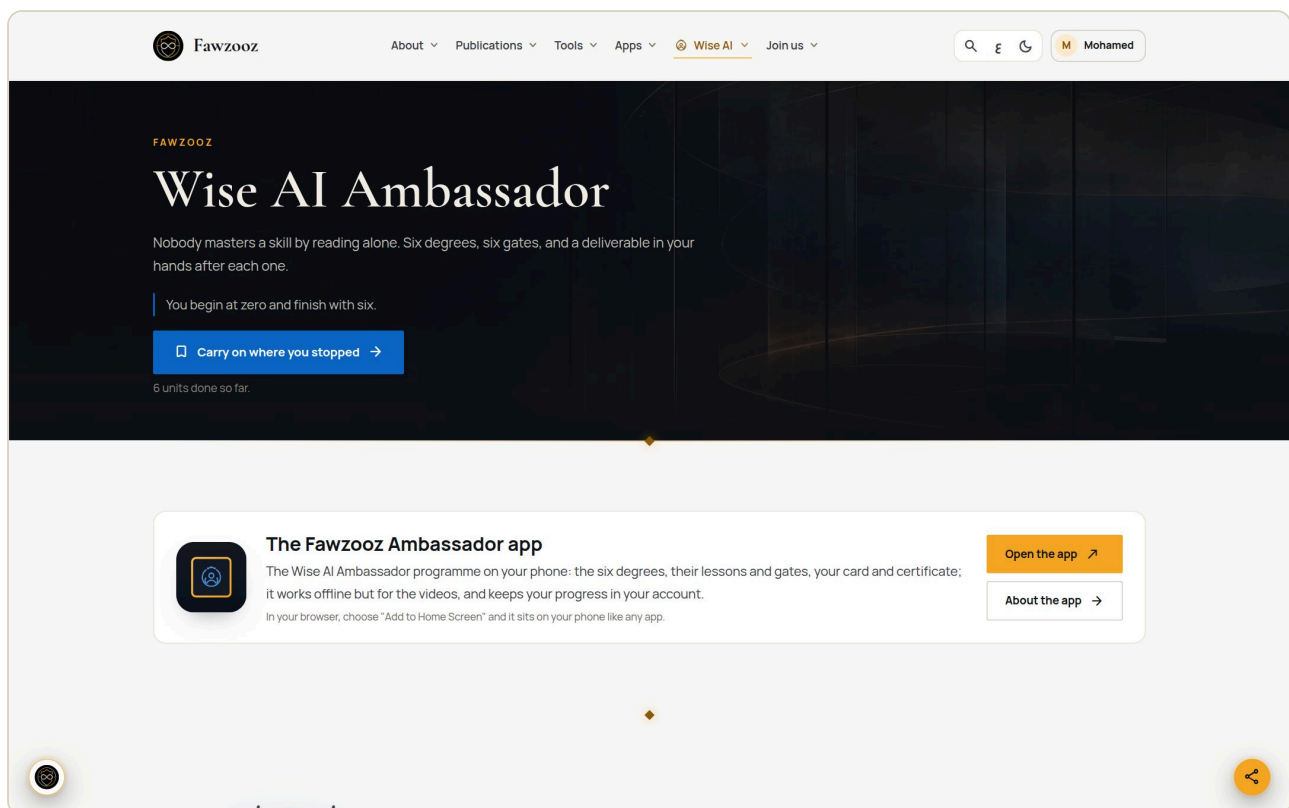

Figure 22 · The programme's page

7.2 Its structure

Degrees	6: You are here; The foundation; Practical mastery; Protection; Governance and resilience; Innovation, leadership and legacy
Units	34
Gates	6, one at the end of each degree
Videos	In Arabic, for the programme, each degree, unit and gate
Cards	A «Metn» set for each degree: a card for every unit and gate
Closing	The charter, and the request for a certificate

Each unit is read in the programme's reader, which remembers the place and the units completed. A gate asks the reader to produce something from what the degree taught; passing it opens the next degree. Each degree's card set gathers its units on pocket cards: the idea, an exercise and the takeaway.

The screenshot displays the Fawzooz programme reader interface. At the top, the Fawzooz logo is on the left, and navigation links (About, Publications, Tools, Apps, Wise AI, Join us) are in the center. A search bar and a user profile (Mohamed) are on the right. Below the header, a breadcrumb trail reads 'The programme / Contents / Seven myths holding you back'. The main title 'Wise AI Ambassador' is prominently displayed. A progress bar indicates 'YOUR JOURNEY' with 6 of 34 units completed. Below this, it states 'You are in Degree 1 - You are here unit 2 of 4 Gate passed'. The left sidebar shows a 'CONTENTS' menu with sections: 'BEFORE YOU START', 'DEGREE 1 - YOU ARE HERE' (with sub-items 1.1 to 1.4), and 'DEGREE 2 - THE FOUNDATION' (with sub-items 2.1 and 2.2). The main content area is titled 'DEGREE 1 - UNIT 1.2' and 'Seven myths holding you back'. It features a section 'BY THE END OF THIS UNIT' with a paragraph about deconstructing common convictions about AI. Below this, two numbered points are listed: 1. 'It will take my job' and 2. 'It understands what I say', each followed by a paragraph of text. The interface is clean with a light beige background and blue accents.

Figure 23 · A unit in the programme's reader

Governance and resilience

Cards for the fifth degree of the Wise AI Ambassador

Write an AI use policy for your organisation, one fit to be carried out, not shelved.

A card for each unit of the degree, with its idea, its exercise and its takeaway, and the gate's card at the end.

7 cards 1 min read

[Open the cards](#) [PDF copy on request](#)

Card 1: Responsibility first

Every automated decision has a person responsible for it.

Exercise: Choose a system your organisation uses, and write down who is responsible for each decision in it.

Takeaway:

Card 2: ISO 42001 in practice

A standard that turns intentions into a system.

Exercise: Compare your organisation's practices with the standard's main clauses, and identify three gaps.

Takeaway: What is not documented and reviewed is not managed.

Card 3: Creative security

Protect innovation; don't stifle it.

Exercise: Design a "sandbox" for your team: what is allowed in it, with what data, and for how long.

Takeaway: An outright ban breeds hidden use.

Card 4: The regulatory landscape

Know the law that governs your tools.

Exercise: List the laws that apply to your organisation's data and to the markets it serves.

Takeaway: Not knowing the rules is no exemption from accountability.

7.3 The charter

After the sixth gate, the charter opens. The reader signs it and asks for the certificate. The next chapter follows the certificate from that request to its public verification.

8 The certificate and its verification

8.1 From the charter to the certificate

To sign the charter, the reader gives their name and email, and confirms the commitment. Signing sends the request at once, with the gate work. One request per email can wait for review at a time.

Nothing is issued automatically. Each request is reviewed, with the reader's answer at every gate, and is either:

- **Approved:** the certificate receives its number, and the reader receives an email with the number, a button to its verification page and a link to the badge page;
- **Declined**, with a note: the reader receives an email with the note and the way back to the programme, and can send a new request.

Until the decision, the badge page shows the request as under review; after it, the decision and its note. The status also appears in «My account».

Figure 4 · From the units to a verifiable certificate

8.2 The certificate number

Every certificate carries a number of the form **AIA-2026-7K3QX9**: the programme's letters, the year it was issued, and six characters. The characters leave out those that are easily confused (0 and O; 1, l and L), so a number read aloud or copied by hand stays right.

8.3 What the holder receives

The badge page («My card and certificate») holds everything that is issued, in the page's language, with the holder's name in that language, after their title:

- **The certificate:** an A4 landscape sheet in PDF, «Fawzooz certifies that...», with the six degrees passed, the date, the number, the seal, and a QR code that opens its verification page; issued by FAWZOOZ, London, United Kingdom, company number 17511660;
- **The membership card:** a wallet-sized honorary membership card, front and back, in PDF to print, with the holder's photo if they add one, «Since» the date it was issued, and a code to verify the membership;
- **The share image:** a 1080 × 1350 image for LinkedIn and Instagram, «I earned the title: Wise AI Ambassador»;

- **Add to LinkedIn:** the certification, its number and its verification link, filled in;
- **The verification link,** ready to copy.

«My account» shows the certificate and its number, with the way to the badge page and to the verification page.

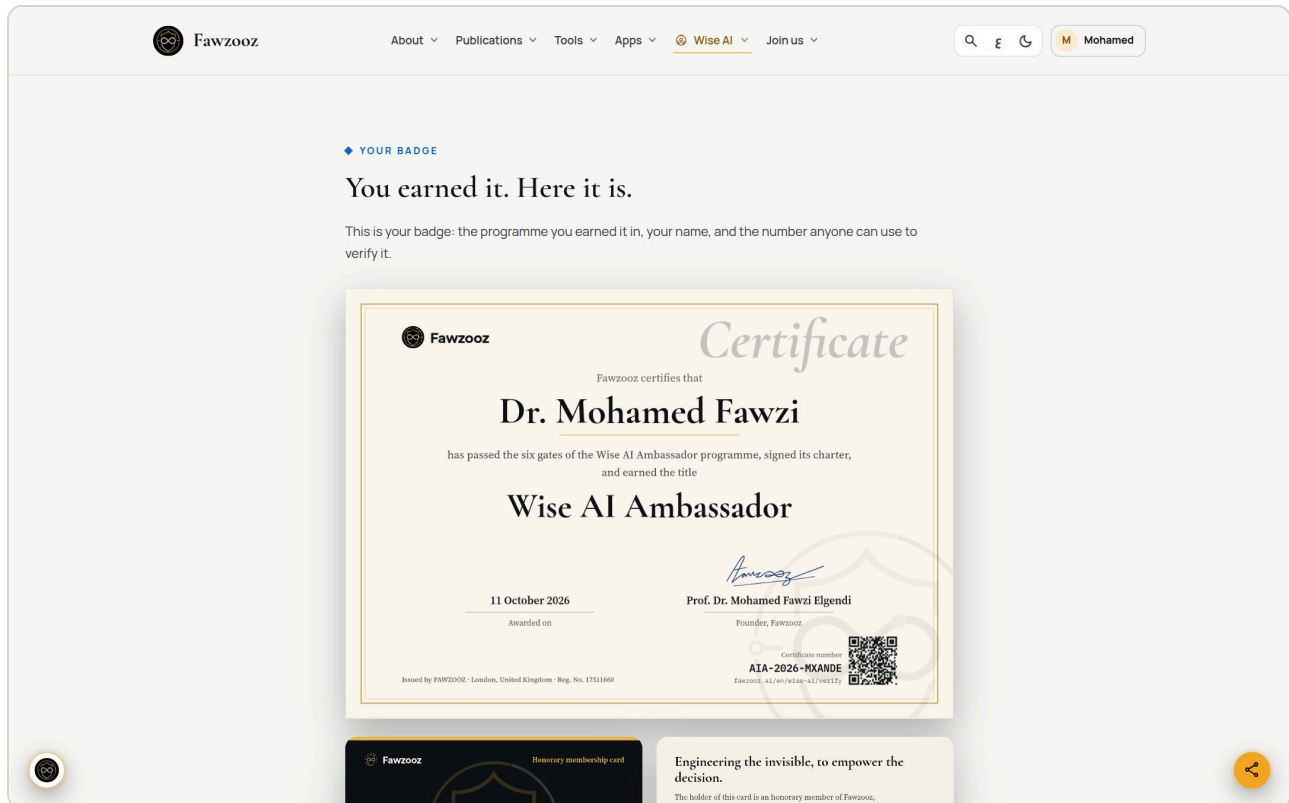

Figure 25 · The badge page: the certificate, the card and what can be downloaded

Figure 26 · The certificate, with its number and its QR code

8.4 How anyone verifies a certificate

Anyone, without an account, can check a certificate in one of three ways:

- scan the QR code printed on the certificate or the card: it opens the verification page with the number already in it;
- open the verification page, fawzooz.ai/en/wise-ai/verify, and type the number;
- ask an AI assistant connected to Fawzooz (section 4.8).

The page gives one of three answers:

Answer	What the page shows
Genuine	The number, the holder's name and the date it was issued
Revoked	The number, the holder's name and the date it was revoked, and that it was issued, then revoked
Not found	That no certificate carries this number; a number of the wrong shape is explained

The page never shows the holder's email or their gate work, and requests under review or declined never appear in it.

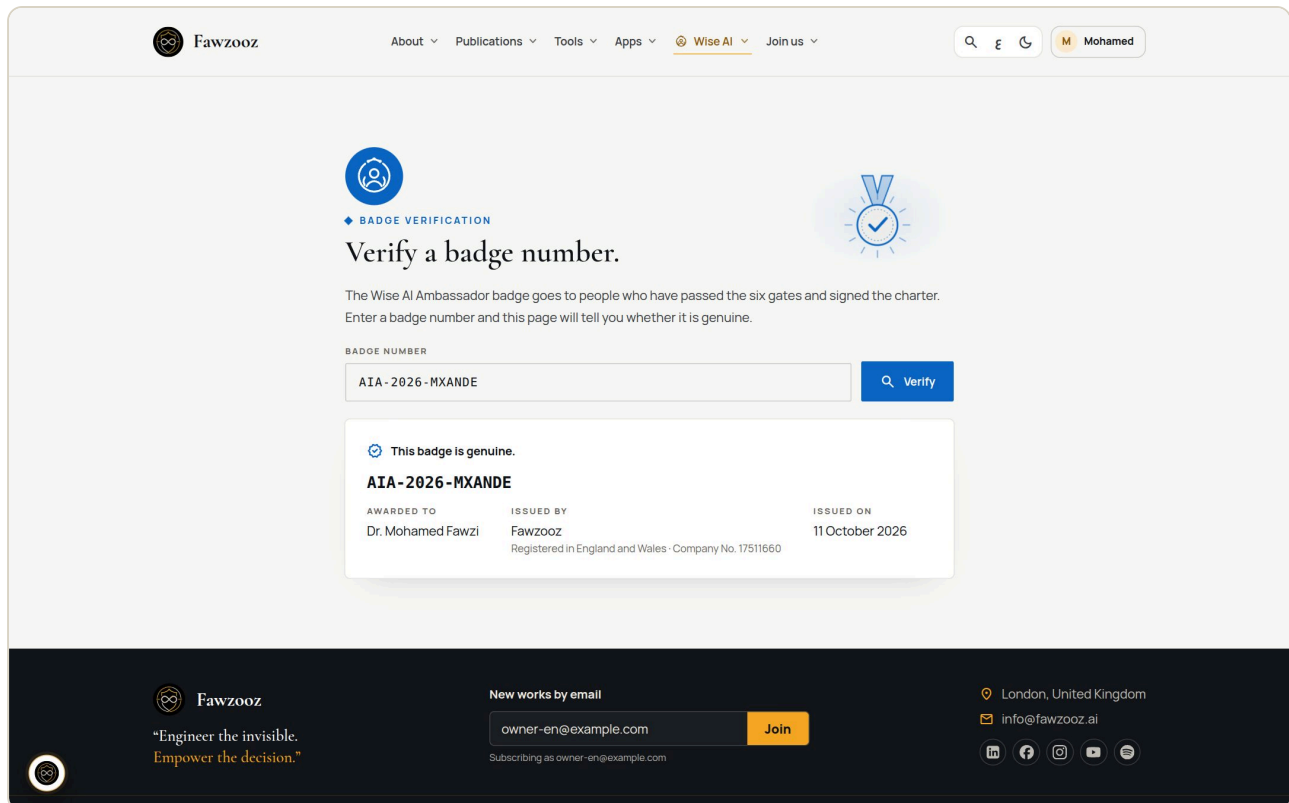

Figure 27 · The verification page: a genuine certificate

8.5 A revoked certificate

A certificate can be revoked after it was issued, and restored later. A revoked number still answers on the verification page, as revoked, so whoever checks it learns its true state. If the holder deletes their account, an issued certificate stays verifiable; only their gate work is erased.

9 The library and the tools

9.1 Books and papers

The books and papers are the source of everything else at Fawzooz. Each is read on the site and in the «Vault» app, as a book or section by section; each has an ISBN for each language, and can be asked for as a personal PDF copy.

Publication	Kind
Awakening Intelligence	Book, second edition
Awakening Security	Book, second edition
The Fawzooz Blueprint	Book, second edition
The Cognitive Firewall	White paper
Vibe Orchestration	White paper, with Part III, «Vibe Orchestration, Applied»
Cognitive SASE Architecture	White paper
InnovaForge	White paper
Cognitive XOps	Playbook
Unified Cognitive Security Maturity Model	Research
Resilience Engineering	Monograph
Invisible Engineering	Biography

The Wise AI Ambassador is a programme rather than a publication, and is read in its own reader (chapter 7). Earlier editions are kept in the archive.

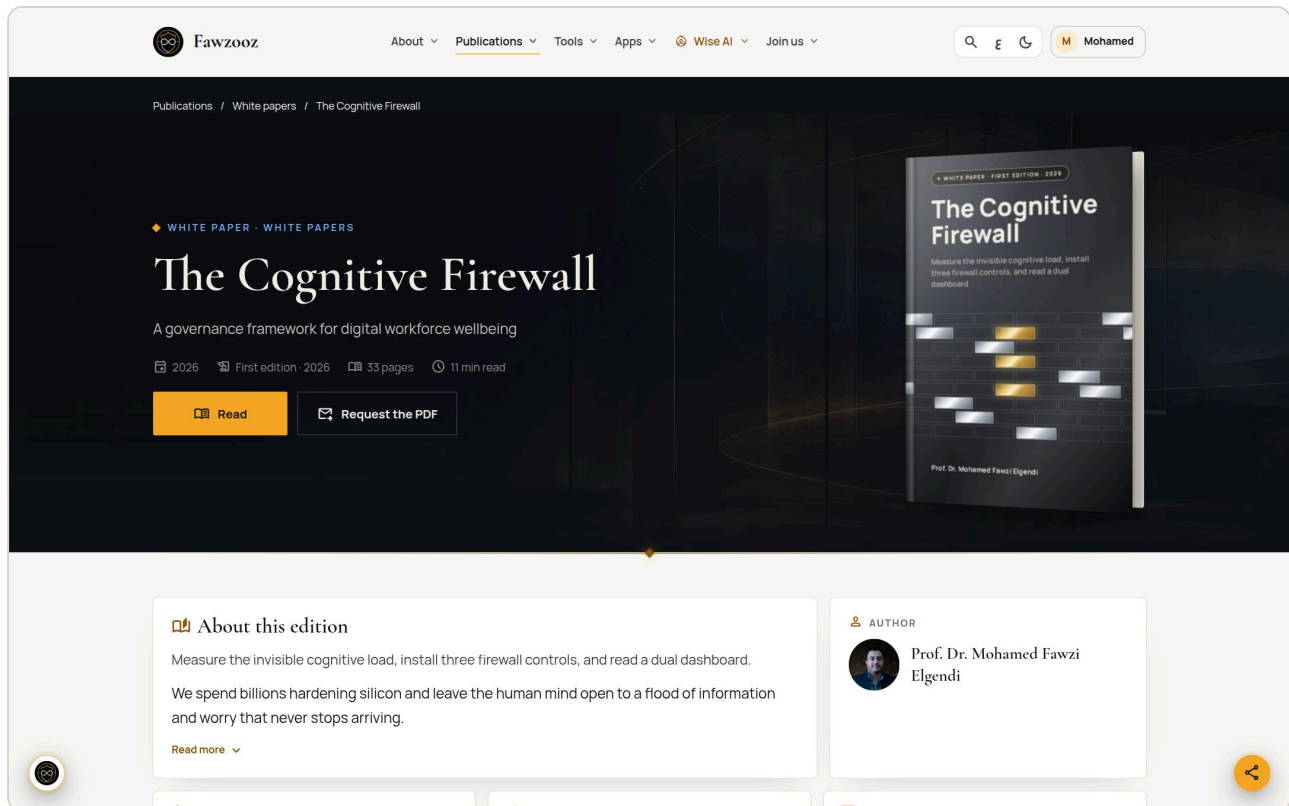

Figure 28 · A publication's page: its cover, its edition and the ways to read it

9.2 The «Fawzoozyat» magazine

«Fawzoozyat» is a story magazine: nineteen issues, each on one theme (the eighteenth in two parts), in Arabic and in English. Every issue has its cover, its imprint, the magazine's manifesto, an editorial, its stories, each with a scene, a drawing and «A view from today», four «Fawzooz capsules», the «Anchor point», a page about the author, and a back cover announcing the next issue.

An issue opens on its own page, and is read in two modes, «Magazine / Read»: the issue's own pages, two facing each other on a wide screen; or story by story, with progress. Each capsule can be downloaded as an image or shared. The «Anchor point» ends the issue with a question: with «Share your answer», a signed-in reader writes their answer, which reaches Fawzooz; an answer can be edited later, and stays in the reader's account. The «Fawzoozyat» app brings a story a day.

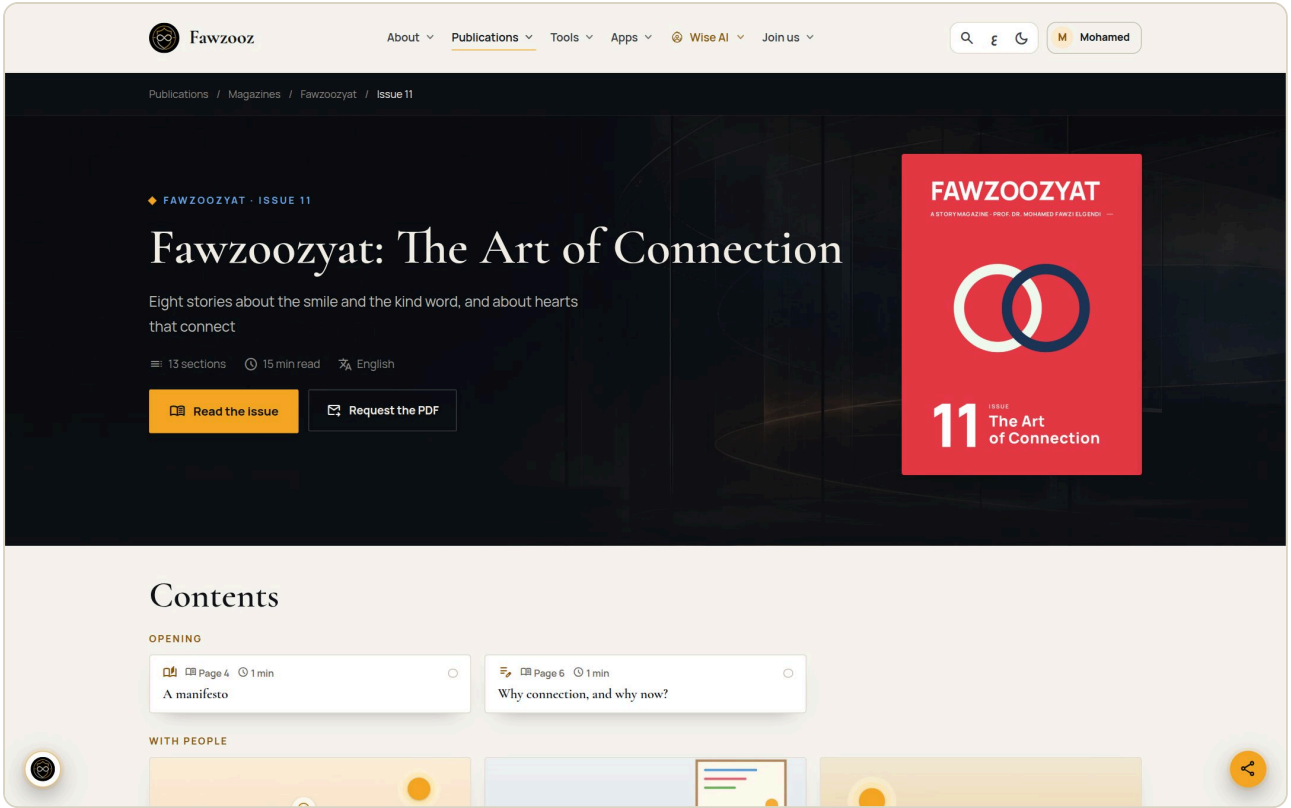

Figure 29 · An issue's page: its title, its theme and the ways to read it

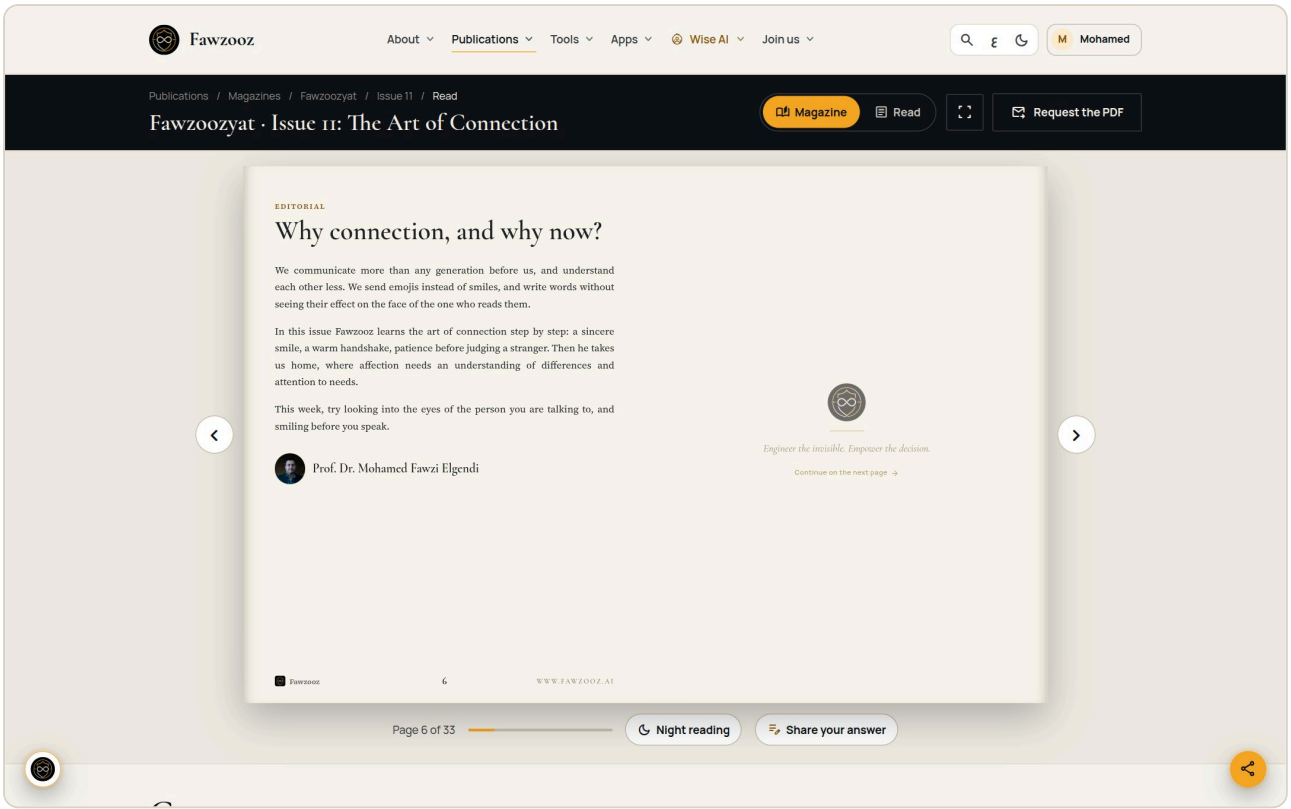

Figure 30 · An issue in the magazine mode

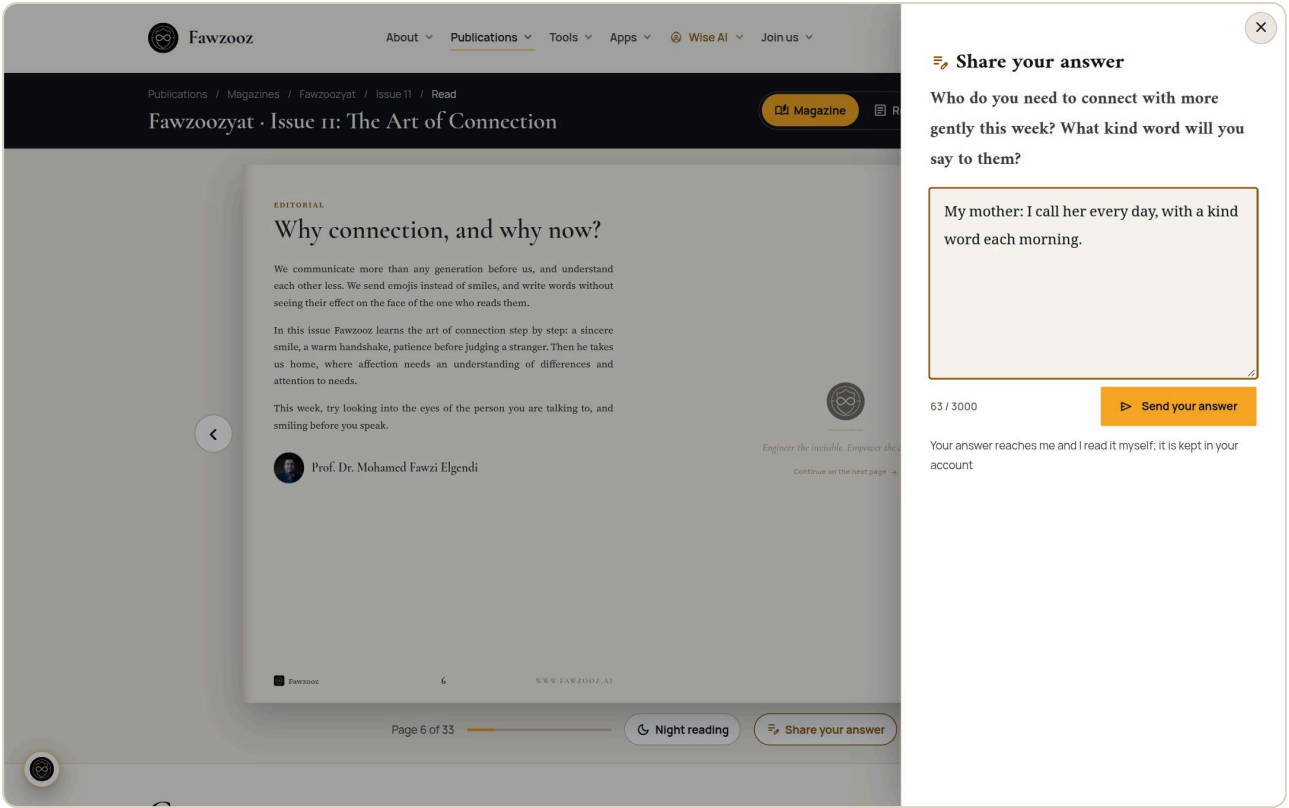

Figure 31 · «Share your answer», over the magazine's pages

9.3 «Metn»: cards of applied wisdom

«Metn» gathers Fawzooz’s card sets: pocket cards, each with one idea, made to be read in a minute and lived with for a day. There are twenty sets, 232 cards in each language, in four fields:

Field	Sets
Self and spirit	Norfi, Fawzooz, Mujaddid, Mualij, Rasheed, Amen
Leadership and innovation	Ronza, Fordj, Mobtakir, Samed
Technology and AI	Waei, Taleeq, Qayyem, Harees
Wise AI Ambassador	Six sets, one for each degree (40 cards)

Each set has its page, where its cards are read and shared one by one, and can be asked for as a personal PDF to print. The «Metn» app brings a card a day.

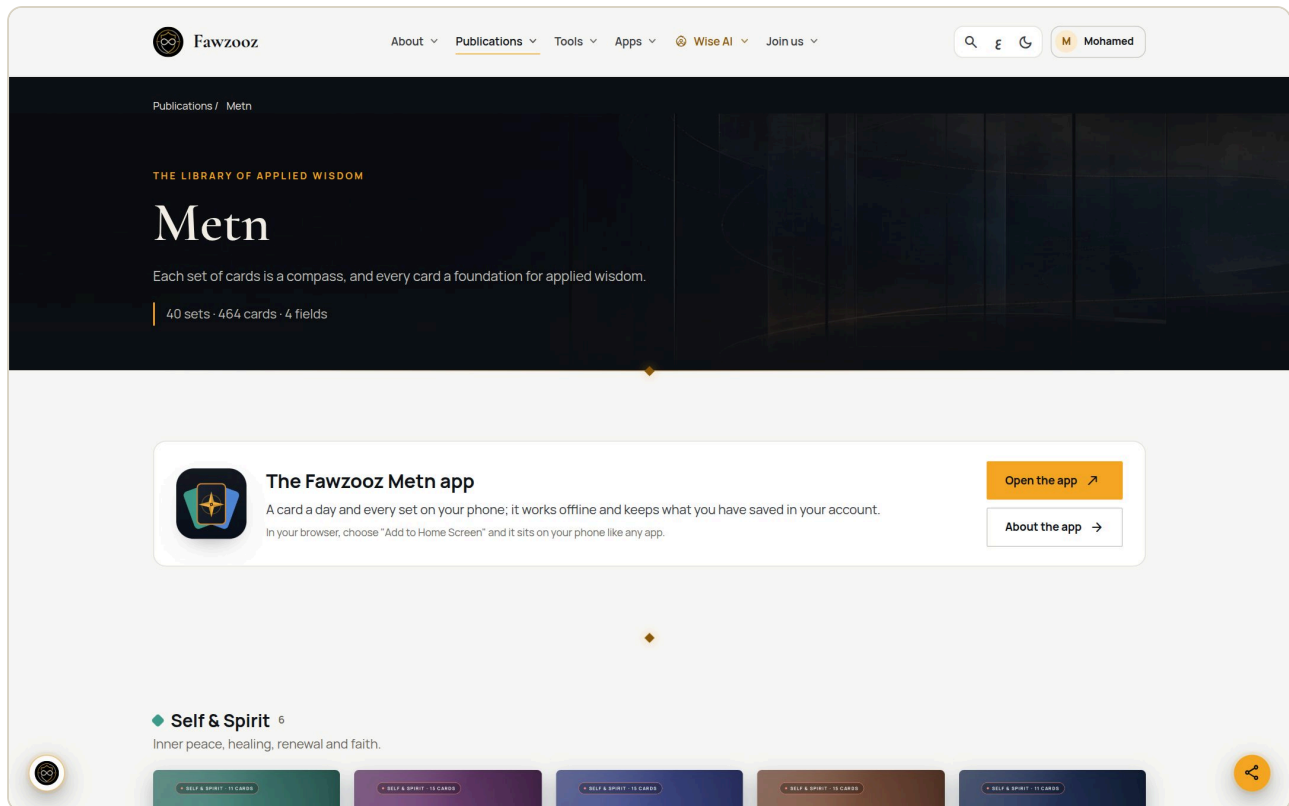

Figure 32 · «Metn»: the card sets, by field

9.4 «Fawzooz Tapestry» and the articles

«Fawzooz Tapestry», «A Guide for the Fluent Technologist», is a series of seventeen articles in five journeys: Charting the Course, Cultivating Flow, Weaving Trustworthy Intelligence, Igniting Human Ingenuity and Sustaining Impact. It is read on the site and in its own app. The articles shelf holds Fawzooz's other articles.

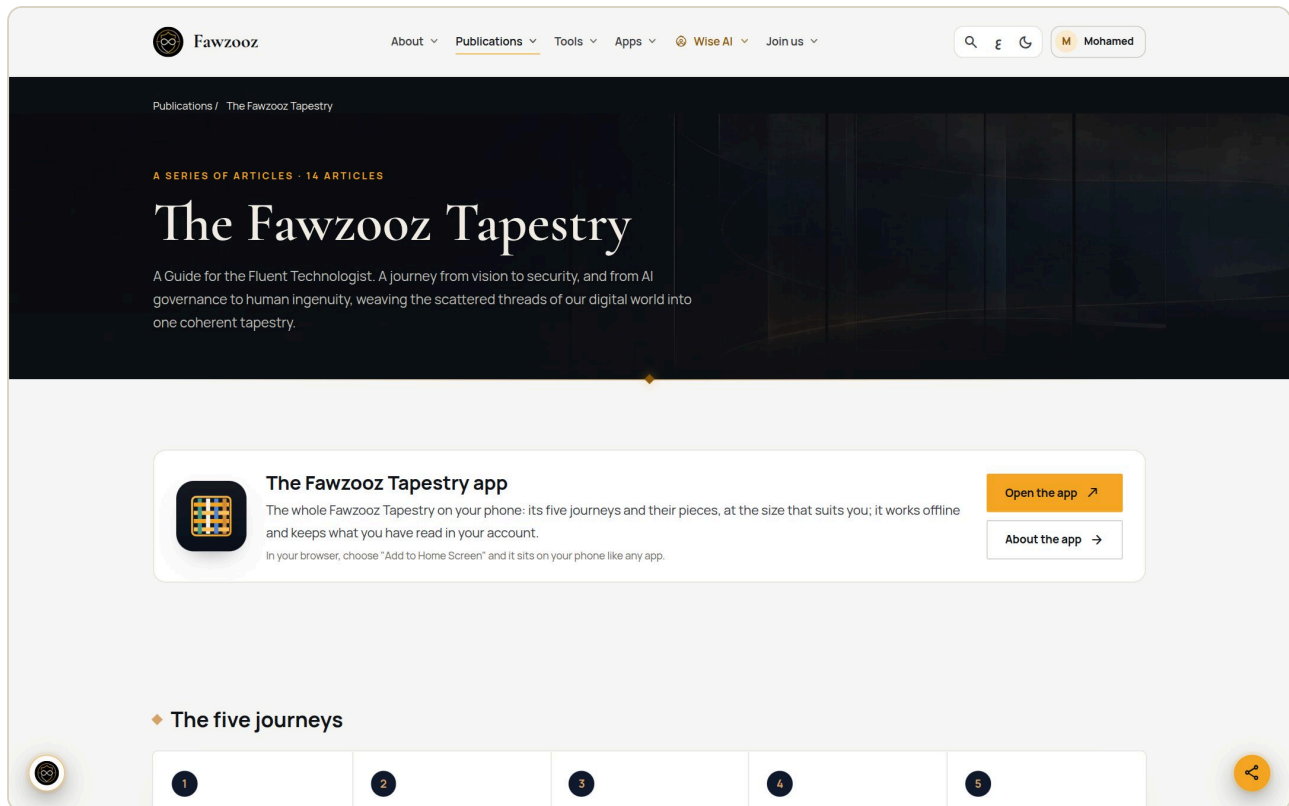

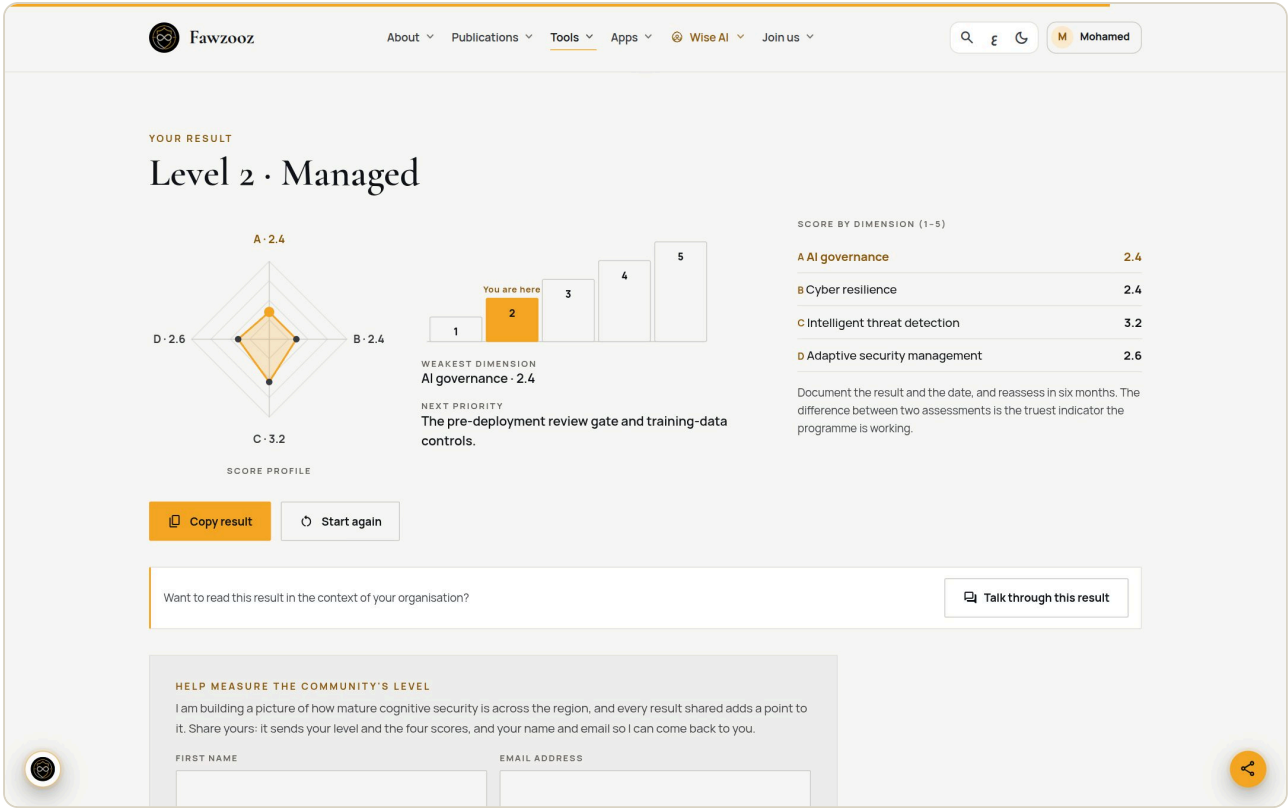

Figure 33 · «Fawzooz Tapestry»: five journeys

9.5 The tools

Tool	Kind	What it gives
UCSMM self-assessment	Assessment	Maturity level, weakest dimension, priority, report
DWCLA cognitive load assessment	Assessment	Load level, load index, report
Resilience Readiness Check	Assessment	Readiness band, weakest phase, matching move, report
Dual-Dashboard	Dashboard	Readings over time, overall reading, report
InnovaForge canvas	Canvas	A working canvas from spark to launch
LCAC Context Scoper	Checklist	The context a model may see, scoped
24-Month Roadmap Builder	Planner	A roadmap in waves
Prompts-as-Code Kit	Kit	Prompts written and versioned as code

The four measuring tools (UCSMM, DWCLA, Resilience and the Dual-Dashboard) feed the community indicators and produce reports, and the «Fawzooz Tools» app asks them one question at a time. Two open kits, the InnovaForge Toolkit and TWYNTRUST, gather ready material to download. Every tool's work stays on the reader's device, and in their account when signed in.

10 Fawzooz in public

10.1 News and events

«News and events» tells what is new, what is planned and what is coming: new works, new apps, programme videos, events. The latest items also appear on the home page.

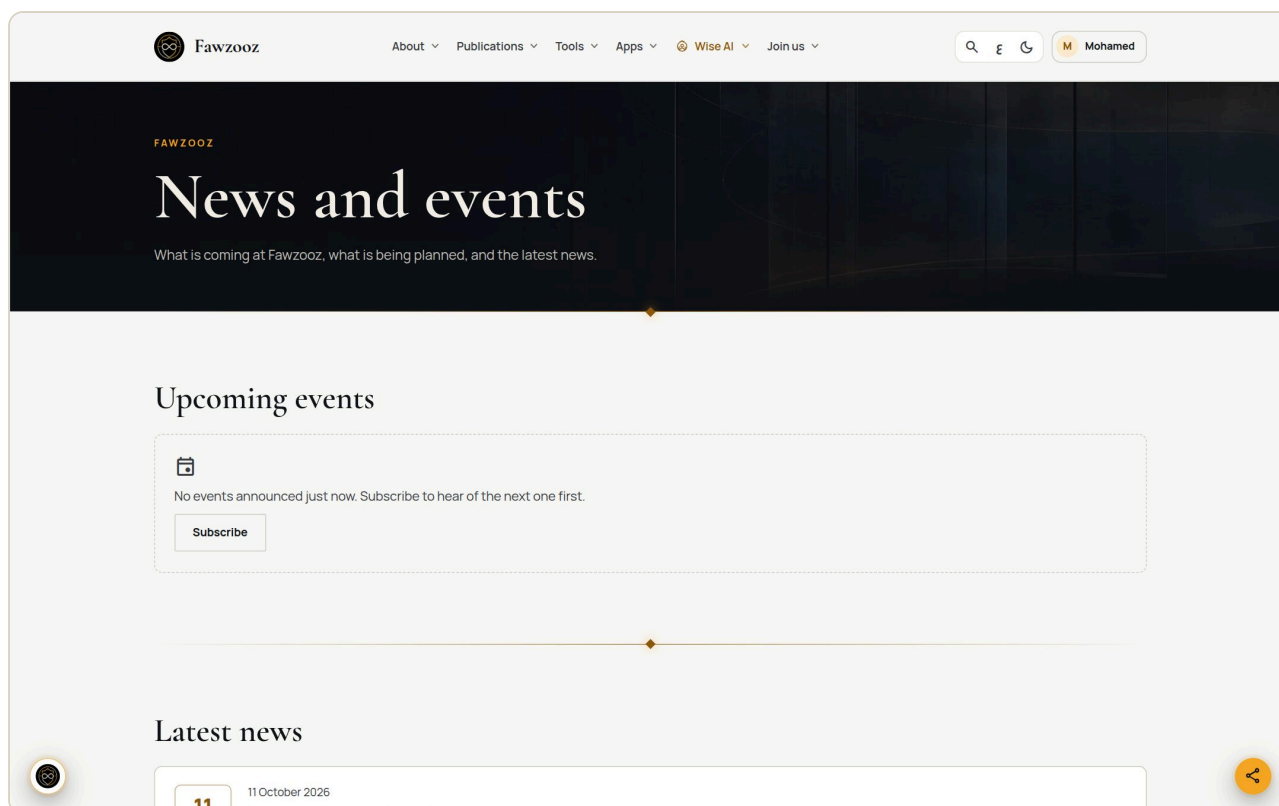

Figure 35 · «News and events»

10.2 Impact in numbers

«Impact in numbers» shows what Fawzooz holds and what it has reached, with live figures counted by the platform itself: PDF copies sent, assessments taken, reader accounts, newsletter subscribers and answers to the magazine; and for the Wise AI programme, its learners, the gates passed and the certificates issued. The figures are counts only; no one is named.

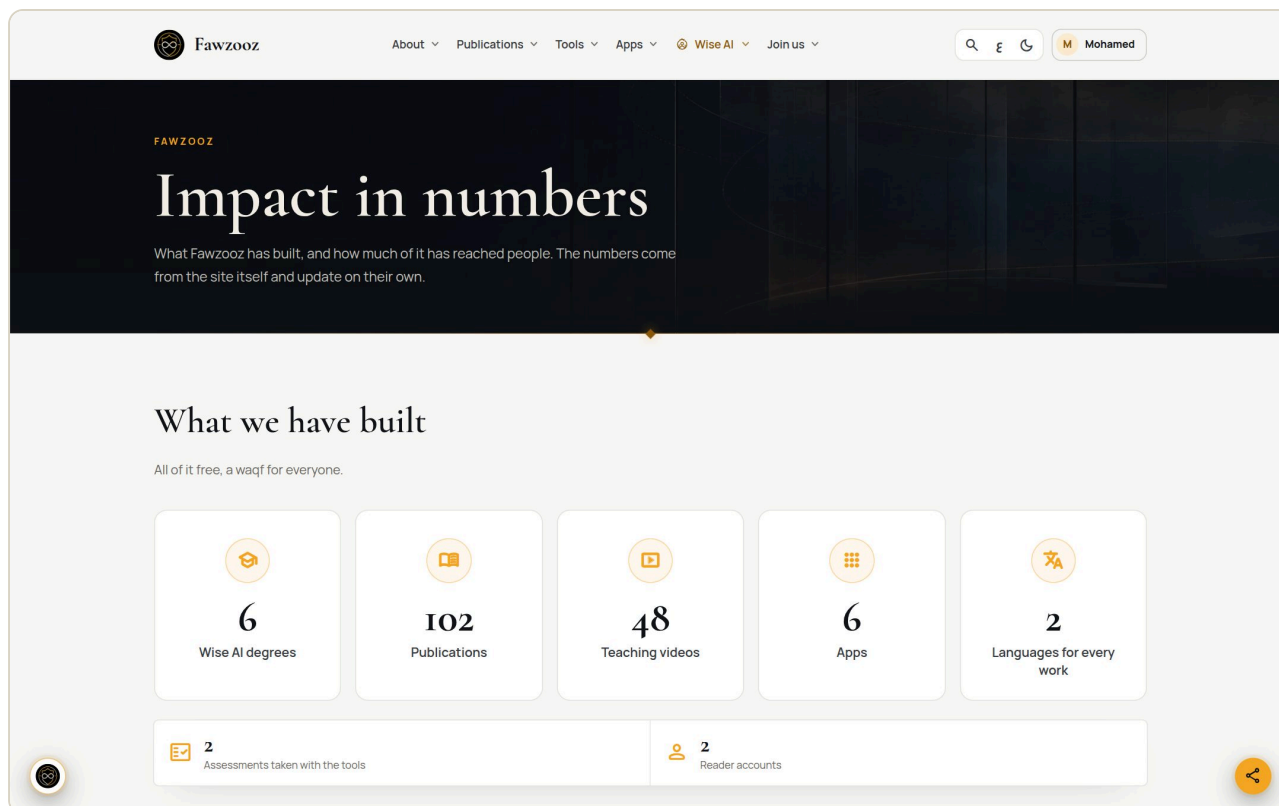

Figure 36 · «Impact in numbers», with live figures

10.3 Taking part

- **Collaborate:** three paths for organisations, advisory and governance, speaking and training (including hosting a Wise AI cohort), and research and adopting the frameworks; each with a short form.
- **Contribute:** five ways to give time and skill, translation, expert review, bringing the programme to where you are, spreading the word, and reporting errors; with a form.
- **Our links:** Fawzooz's channels on social media, in one place.

10.4 Press

The «Press» page gathers what a journalist or a partner needs: a ready description of Fawzooz, the founder's biography and roles, the seal, the logo and the portraits to download, and «Fawzooz in your AI assistant» (section 4.8).

10.5 Policies

Fawzooz publishes, in both languages, its privacy policy, its safeguarding policy for children and adults at risk, and its acceptable-use policy, beside the Waqf licence. They are linked from the foot of every page.

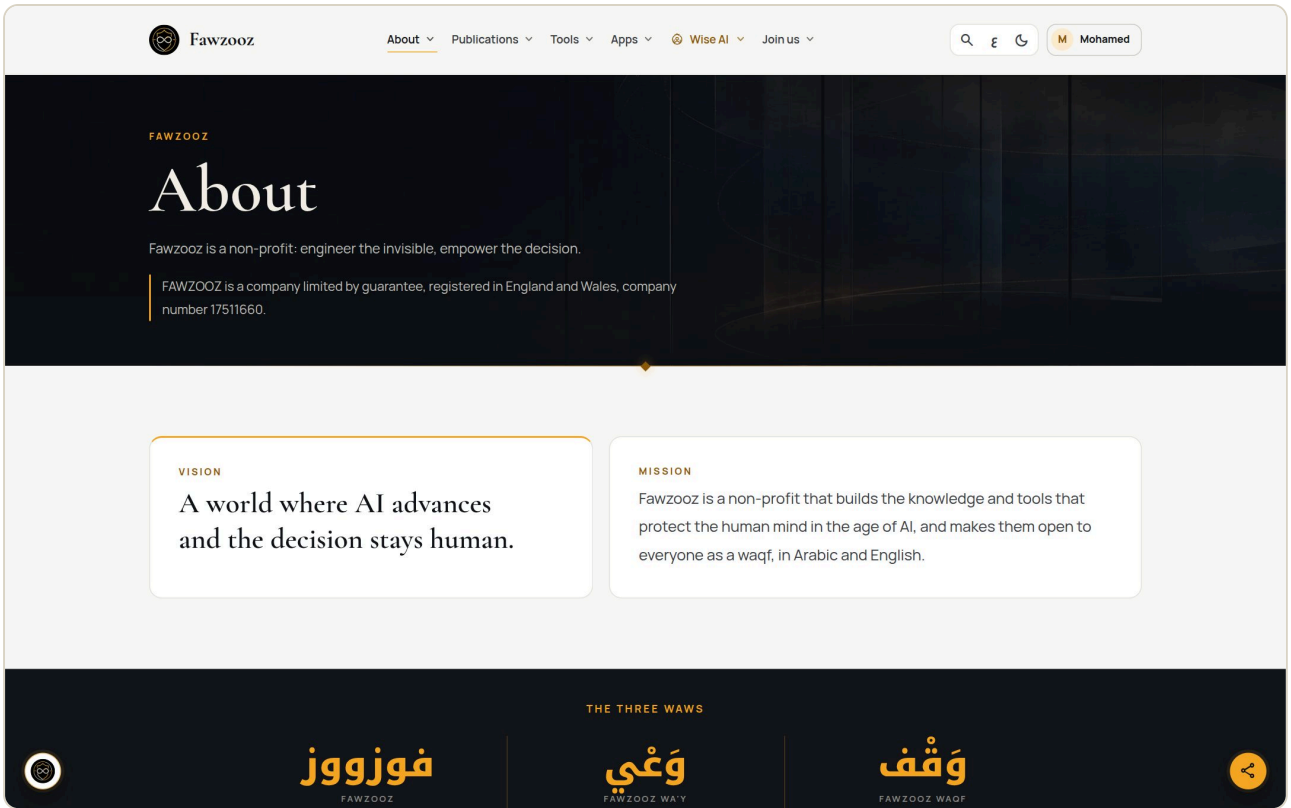

Figure 37 · «About Fawzooz»: vision, mission, goals and the legal note

11 Security and trust

11.1 Principles

- **Least data:** Fawzooz asks only for what a feature needs, and keeps it only as long as it needs it.
- **Verified people:** accounts and the assistant need a proved email address.
- **Protection in transit and in the browser:** connections are encrypted, and pages carry strict security headers that limit what a page can load and where it can send data.
- **Verifiable documents:** certificates, membership cards and personal copies each carry a code that anyone can check, without revealing the holder's email.

11.2 Retention

A daily cleanup applies the retention schedule, whatever the traffic:

Data	Kept
Assistant conversations	90 days
«Message Fawzooz» conversations	90 days
Sign-in codes	1 day
Copy checks on «Verify a copy»	1 day
Subscribers who never confirmed, or left	30 days
Address records used for rate limits	30 days
Answers to the magazine's questions	2 years after the last change
Personal paths	2 years after the last activity
Gifts, and emails written to one person	2 years
Accounts, progress, requests, messages, certificates	Until the reader deletes their account, or asks; an issued certificate stays verifiable

11.3 Contact

Questions, partnerships and concerns are welcome at **info@fawzooz.ai**. Security concerns are welcome at **me@fawzooz.ai**, with "Security" in the subject.

12 Glossary

Anchor point

The question that ends each issue of «Fawzoozyat»; readers answer it with «Share your answer».

Apps

Six web apps, one for each part of Fawzooz, installed from the browser; they work offline and share the reader's account.

Assistant («Fawzooz»)

Fawzooz's AI assistant. It answers from the published works and lists its sources.

Badge

A reading badge, earned by reading a publication to its last section. Not a certificate.

Band

The level a tool's score falls in, with the advice that goes with it.

Book mode

Reading a publication as its own pages, two facing pages on a wide screen.

Capsule

A short card in each issue of «Fawzoozyat», to download as an image or share.

Certificate

The Wise AI Ambassador certificate, issued by FAWZOOZ after review, with a number anyone can verify.

Certificate number

The number a certificate is issued with, of the form AIA-2026-7K3QX9.

Charter

The closing commitment of the Wise AI Ambassador programme, signed before asking for the certificate.

Community average

The average of anonymous results on a measuring tool, shown once ten people have taken it.

Copy code

The ten-character code of a personal PDF copy, checked on «Verify a copy».

Degree

One of the six stages of the Wise AI Ambassador programme, each ending in a gate.

Fawzoozyat

Fawzooz's story magazine: nineteen issues, in Arabic and in English.

Fawzooz Tapestry

A series of seventeen articles in five journeys, «A Guide for the Fluent Technologist».

Gate

The task at the end of each degree; passing it opens the next one.

Gift

A personal copy of a publication, sent to someone as a gift.

MCP

The Model Context Protocol: the open standard through which AI assistants search and read Fawzooz at mcp.fawzooz.ai.

Measuring tool

A tool that scores the reader's answers: UCSMM, DWCLA, Resilience and the Dual-Dashboard.

Membership card

The Wise AI Ambassador's wallet-sized honorary membership card, front and back.

Message Fawzooz

A direct conversation with Fawzooz, answered by a person, from the assistant's window, for signed-in readers.

Metn

Fawzooz's card sets of applied wisdom: twenty sets, 232 cards in each language.

Personal copy

A PDF issued to one person: a page after the cover carries a letter and the copy's box, with their name, email, the date and a code anyone can verify.

Personal path

A route through the works, one step at a time by email or Telegram, at the reader's chosen pace.

QR code

The square code on a certificate, a card or a copy; scanning it opens its verification page.

Report

A branded summary of a measuring tool's result, saved as PDF by a signed-in reader.

Revoked certificate

A certificate withdrawn after it was issued; its number still answers on the verification page, as revoked.

Title

What goes before a reader's name (Prof. Dr., Dr., Eng., Mr, Ms), written as each language writes it.

Unit

One lesson of the Wise AI Ambassador programme; there are 34, in six degrees.

Wa'y

Awareness: using AI with a conscious mind; the Fawzooz Wa'y Standard sets out how.

Waqf

An endowment: Fawzooz's works are given freely, under the Fawzooz Waqf Licence.
